The World That Was Destroyed

TRUTH CARRIERS MINISTRY

# **BEFORE THE FLOOD**

The World They Don't Want You to See

Evidence for a Young Earth, Pre-Flood Giants, and the Global Catastrophe That Changed Everything

Truth Carriers Ministry

2025

## **DEDICATION**

To those who have been told that Scripture contradicts science, and to those who dare to question what they've been taught.

The evidence was always there. They just didn't want you to see it.

"For the wrath of Elohim is revealed from heaven against all wickedness and unrighteousness of men, who suppress the truth in unrighteousness, because what may be known of Elohim is manifest in them, for Elohim has shown it to them.

For since the creation of the world His invisible attributes are clearly seen, being understood by the things that are made, even His eternal power and Mightiness, so that they are without excuse, because, although they knew Elohim, they did not esteem Him as Elohim, nor gave thanks, but became vain in their reasonings, and their undiscerning heart was darkened.

Claiming to be wise, they became fools..." (Romans 1:18-22)

## **IMPORTANT DISCLAIMER**

## A Note About This Book's Relationship to Scripture:

The other books in the Truth Carriers Ministry series (The Solar Key, Mystery Babylon Exposed, The Mark You Already Have, The Image of the Beast, The Wrath of Yahuah, The Fire From Above, and The Remnant's Handbook) are directly based on Scripture. They interpret and explain what the Bible explicitly teaches about prophecy, doctrine, the Mark of the Beast, Torah observance, and end-times events.

This book is different.

While Before the Flood uses Scripture as its foundation (Genesis 1-11, Job 40-41, and other passages), it also presents scientific evidence, geological interpretations, historical accounts, and inferences that support the biblical account but are not explicitly commanded or detailed in Scripture.

## What This Means:

## Why This Book Exists:

We live in a world that claims "science disproves the Bible." This book demonstrates that the opposite is true: the physical evidence, when examined honestly, supports the biblical account of a young earth, a global flood, and humans coexisting with the creatures we now call dinosaurs.

But if you finish this book and remain uncertain about the age of the earth, that's okay. What is not optional is believing what Scripture explicitly commands: repentance, Torah obedience, rejecting the Mark, and preparing for Yahusha's return. Those truths are clearly stated in the Word and are the focus of the other books in this series.

Read this book with discernment. Test everything. Hold fast to Scripture above all else.

— Truth Carriers Ministry

## **TABLE OF CONTENTS**

### **PART 1: THE TIMELINE LIE**

### **PART 2: THE PRE-FLOOD WORLD**

### **PART 3: THE FLOOD**

### **PART 4: THE ARK**

### **PART 5: THE COVER-UP**

### **PART 6: SCRIPTURE'S ACCOUNT**

## **CONCLUSION**

## **APPENDICES**

## **INTRODUCTION: WHAT YOU'RE ABOUT TO READ**

You've been lied to.

From the moment you entered school, you were taught that the earth is billions of years old. That dinosaurs died out 65 million years ago. That fossils formed slowly over eons. That Noah's flood, if it happened at all, was a local event. That Scripture is mythology.

You were told this is "science."

But what if the evidence—the actual physical evidence—points in the opposite direction?

What if soft tissue has been found in dinosaur bones that are supposedly 65 million years old—tissue that cannot survive

more than thousands of years?

What if carbon-14—which decays completely in less than 100,000 years—has been found in diamonds supposedly billions of years old?

What if tree trunks have been found standing upright through multiple layers of rock—layers that supposedly represent millions of years?

What if every ancient culture on earth has a flood legend?

What if humans and "dinosaurs" are depicted together in ancient artwork from multiple civilizations?

What if the Ark has been found?

What if everything you were taught was designed to hide one simple truth: The Bible is accurate history.

This book will present evidence. Not speculation. Not religious wishful thinking. Evidence.

Evidence that the earth is young—approximately 6,000 years old, just as Scripture indicates.

Evidence that pre-flood conditions allowed humans and animals to grow to enormous sizes and live for centuries.

Evidence that "dinosaurs" are simply large reptiles that lived in those conditions—and that humans called them dragons.

Evidence that a global catastrophic flood occurred—and that the fossil record is the graveyard of that event.

Evidence that this information has been systematically suppressed.

## **Why Does This Matter?**

Because if Genesis is true, there is a Creator.

If there is a Creator, He has authority over His creation.

If He has authority, we are accountable to Him.

That's why they suppress it.

Evolution is not a scientific position—it's a religious one. It's the religion of secular humanism, designed to remove Yahuah from the equation. If you can convince people that life arose by random chance over billions of years, you remove the need for a Creator. And if there's no Creator, there's no judgment. No accountability. No sin. No need for a Savior.

The stakes are eternal.

## **What This Book Will Do**

This book is structured in six parts:

Part 1exposes the lie of deep time and presents the biblical timeline.

Part 2describes the pre-flood world—what conditions were like before the catastrophe.

Part 3presents evidence that the global flood is real and that it produced the fossil record.

Part 4demonstrates that Noah's Ark was feasible—and that physical evidence of it exists.

Part 5documents the suppression of evidence and the smoking guns they can't explain away.

Part 6returns to Scripture and shows that the biblical account is consistent, literal, and true.

## A Note on Sources

Every major claim in this book will be sourced. You'll see citations to scientific papers, historical documents, photographs, and Scripture. This is not based on "faith alone"—it's based on evidence that faith and reason align perfectly when you stop suppressing the truth.

Where images are described but not included in this text edition, they are documented and can be researched independently.

## A Warning

This book will challenge everything you've been taught. If you've spent years believing in evolution and deep time, cognitive dissonance will set in. That's normal. The question is: will you follow the evidence wherever it leads, or will you cling to what you were taught?

"Prove all things; hold fast that which is good." (1 Thessalonians 5:21)

Let's prove all things.

## PART 1: THE TIMELINE LIE

Why millions of years are necessary for evolution—and why the evidence doesn't support them

## CHAPTER 1: WHY THEY NEED MILLIONS OF YEARS

Evolution is impossible without deep time.

That's not an exaggeration. It's an admission from evolutionists themselves. Random mutations and natural selection cannot produce the complexity we see in living organisms without vast

stretches of time. Remove the billions of years, and evolution collapses.

That's why the timeline is so critical. It's not a peripheral issue. It's the foundation. If the earth is only thousands of years old, there wasn't enough time for single-celled organisms to evolve into humans. The entire evolutionary framework falls apart.

This chapter will show you why evolutionists need millions (and billions) of years—and how they construct the illusion of deep time through circular reasoning and assumption-laden dating methods.

## Time: Evolution's Magic Ingredient

Imagine you're told that a tornado swept through a junkyard and assembled a Boeing 747. You'd reject that immediately—it's absurd. The odds are astronomically against it.

But what if I told you it wasn't one tornado, but millions of tornadoes, over billions of years? Does that make it more plausible?

No. It just spreads the impossibility over a longer timeline.

That's evolution. It takes a process we know doesn't work—random, unguided events producing functional complexity—and stretches it over billions of years, hoping you won't notice the sleight of hand.

"Time is in fact the hero of the plot... given so much time, the 'impossible' becomes possible, the possible becomes probable, and the probable becomes virtually certain. One has only to wait: time itself performs the miracles."

— George Wald, Nobel Prize-winning biologist, *Scientific American*, August 1954

Read that again. Time is the "hero of the plot." Time "performs the miracles."

This is not science. This is faith. Faith that, given enough time, the impossible becomes inevitable.

But here's the problem: there are hard limits to what random processes can accomplish, regardless of time.

A thousand tornadoes in a junkyard will never build a 747. A billion tornadoes won't either. Not because there isn't enough time, but because tornadoes don't build things—they destroy things. Random processes don't produce functional complexity. They produce chaos.

The same applies to biology. Random mutations are copying errors in DNA. The vast majority are neutral or harmful. Beneficial mutations are exceedingly rare—and even when they occur, they don't produce new genetic information. They shuffle or degrade existing information.

You can't build a library by introducing typos, no matter how many billions of years you wait.

## **The Circular Reasoning Problem**

So how do evolutionists "know" the earth is billions of years old?

They'll tell you: radiometric dating and the fossil record.

But here's the dirty secret: these two methods rely on each other.

It works like this:

Do you see the circle?

The age of the rock is determined by the fossils in it. The age of the fossils is determined by the rock they're in.

This is not independent verification. It's circular reasoning.

#### EVIDENCE BOX: Evolutionists Admit the Circle

"The only chronometric scale applicable in geologic history for the stratigraphic classification of rocks and for dating geologic events exactly is furnished by the fossils. Owing to the irreversibility of evolution, they offer an unambiguous time-scale for relative age determinations and for worldwide correlations of rocks."

— O.H. Schindewolf, American Journal of Science, June 1957

Translation: We date rocks by the fossils in them.

"And this poses something of a problem: If we date the rocks by their fossils, how can we then turn around and talk about patterns of evolutionary change through time in the fossil record?"

— Niles Eldredge, evolutionist, Time Frames, 1985, p. 52

Translation: We're using circular reasoning, and we know it.

The fossil record doesn't prove evolution over millions of years. The fossil record is interpreted through the assumption of evolution over millions of years. That's backwards.

## **Radiometric Dating: Built on Assumptions**

What about radiometric dating? Isn't that objective science?

Not quite.

Radiometric dating measures the ratio of parent isotopes to daughter isotopes in a rock sample. For example, uranium-238 decays into lead-206 at a known rate (half-life of 4.5 billion

years). By measuring how much uranium and lead are in a sample, you can theoretically calculate how old it is.

But here's what they don't tell you: radiometric dating relies on three critical assumptions.

## **Assumption 1: You Know the Starting Conditions**

You have to assume how much parent and daughter isotope were in the rock when it formed. If the rock started with some daughter isotope already present, the calculated age will be inflated.

Can we know the starting conditions? No. We weren't there. We're assuming.

## **Assumption 2: The Decay Rate Has Always Been Constant**

You have to assume that the radioactive decay rate has never changed—not during catastrophic events like a global flood, not during formation of the earth, not ever.

Can we know this? No. We can only observe decay rates now. Extrapolating billions of years into the past requires assuming uniformity—an assumption, not a measurement.

## **Assumption 3: The System Has Remained Closed**

You have to assume that no parent or daughter isotopes have been added or removed from the rock over its entire history—no leaching, no contamination, no environmental factors.

Can we verify this? No. We're assuming.

Three assumptions. Zero direct verification. And yet this is presented as objective fact.

## When Radiometric Dating Fails

The assumptions wouldn't matter if radiometric dating produced consistent, reliable results.

It doesn't.

Consider these documented examples:

### EVIDENCE BOX: Radiometric Dating Failures

#### 1. Mount St. Helens (1980 eruption)

Rock formed in the 1980 eruption was sent to a lab for dating. The lab didn't know it was only a few years old. Result: Dated at 350,000 to 2.8 million years old.

Source: Steven Austin, *Acts & Facts*, ICR, 1996

#### 2. Hawaiian Lava Flows (1800-1801)

Lava flows from the Hualalai volcano (Hawaii) erupted in 1800-1801. Known age: ~200 years. Potassium-argon dating result: 160 million to 3 billion years old.

Source: J.G. Funkhouser and J.J. Naughton, *Journal of Geophysical Research*, 1968

#### 3. Mount Ngauruhoe (New Zealand)

Lava flows from eruptions in 1949, 1954, and 1975. Known age: decades. Potassium-argon dating result: 270,000 to 3.5 million years old.

Source: Andrew Snelling, *Creation Ex Nihilo Technical Journal*, 2000

#### 4. Grand Canyon Basalts

Lava flows at the top of the Grand Canyon were dated using five different radiometric methods. Results ranged from 10,000 years to 117 million years—same sample, different methods, wildly different results.

Source: Steven Austin, Grand Canyon: Monument to Catastrophe, 1994

These are not isolated cases. These are rocks of known age that were dated using the same methods applied to rocks of unknown age.

When the method fails on rocks we know the age of, why should we trust it on rocks we don't?

Answer: We shouldn't.

## How the Geologic Column Was Created

The "geologic column" is the diagram you see in textbooks showing layers of rock stacked in order: Cambrian, Ordovician, Silurian, Devonian, and so on. It looks scientific. It looks like observation.

It's not.

The geologic column was created before radiometric dating existed. It was assembled in the 1800s by geologists like Charles Lyell and William Smith, who were operating under the assumption that the present is the key to the past (uniformitarianism) and that slow, gradual processes built up the layers over millions of years.

They arranged fossils into a supposed evolutionary sequence and assigned ages based on that assumption. The geologic column is not a measurement—it's an interpretation based on

evolutionary assumptions.

And here's the kicker: nowhere on earth does the complete geologic column actually exist.

That's right. The diagram in your textbook is a theoretical construct. Certain locations have some of the layers, but no location has all of them in the order shown. The column is a composite—a stitched-together model built from scattered data and arranged to fit the evolutionary story.

"The charge that the construction of the geologic scale involves circularity has a certain amount of validity... Thus, the procedure is far from ideal and the geologic ranges are constantly being revised."

— David M. Raup, Field Museum of Natural History Bulletin, 1983

Translation: Yes, it's circular. Yes, we keep changing it. But trust us anyway.

## Why They Need the Timeline

Let's return to the question: Why do they need millions of years?

Because without it, evolution is exposed as impossible.

If you tell people that a single-celled organism became a human in 6,000 years, they'll laugh at you. It's absurd. The complexity gap is too vast. The time is too short.

But stretch it out to billions of years, and people's critical thinking shuts down. "Well, I guess if you have enough time, anything can happen."

No. It can't.

Time does not create information. Time does not design. Time does not build. Time, plus random mutations, produces genetic degradation—not innovation.

The timeline is the magician's misdirection. While you're staring at the billions of years, you're not noticing that the mechanism (random mutation + natural selection) doesn't work.

## What If the Earth Is Young?

What if the evidence actually points to a young earth?

Then evolution is dead on arrival.

Then fossils aren't a record of millions of years—they're a graveyard from a single catastrophic event.

Then "dinosaurs" didn't go extinct 65 million years ago—they lived alongside humans and were called dragons.

Then the global flood isn't mythology—it's history.

Then Genesis is true.

Then there is a Creator.

Then we are accountable to Him.

And that's exactly why they suppress the evidence.

"For this they willingly are ignorant of, that by the word of Elohim the heavens were of old, and the earth standing out of the water and in the water: whereby the world that then was, being overflowed with water, perished." (2 Peter 3:5-6)

They are "willingly ignorant." Not ignorant by accident—willingly. They suppress the truth because accepting it would require submission to the Creator.

That's why deep time exists. Not because the evidence demands it, but because the alternative is unthinkable to those who refuse to bow the knee.

In the next chapter, we'll see what Scripture actually says about the timeline—and why there are no gaps for millions of years.

## **CHAPTER 2: THE BIBLICAL TIMELINE**

Scripture provides a chronology. Not an allegory. Not mythology. A chronology.

From Adam to Noah, the ages are listed. From Noah to Abraham, the ages are listed. From Abraham to the present, we have historical records. When you add it up, you get approximately 6,000 years from creation to today.

This isn't a fringe interpretation. For the first 1,800 years of church history, this was the standard view. It was only after Darwin that theologians began scrambling to fit "millions of years" into Genesis. Before evolution required deep time, nobody read Genesis and saw billions of years.

This chapter will walk through the biblical timeline and show why there are no gaps for inserting millions of years.

### **Genesis 5: Adam to Noah**

Genesis 5 gives us the genealogy from Adam to Noah. It's not vague. It's precise.

"And Adam lived one hundred and thirty years, and begot a son in his own likeness, after his image, and called his name Seth."  
(Genesis 5:3)

"Seth lived one hundred and five years, and begot Enosh."  
(Genesis 5:6)

"Enosh lived ninety years, and begot Kenan." (Genesis 5:9)

The pattern repeats for ten generations, from Adam to Noah. Each verse gives the father's age when the son was born. These aren't symbolic numbers. They're chronological data.

Let's list them:

Total from Adam to the Flood:  $130 + 105 + 90 + 70 + 65 + 162 + 65 + 187 + 182 + 600 = 1,656$  years

That's not millions of years. That's not even thousands of years plural. It's 1,656 years from Adam's creation to the global flood.

## **The "Gaps" Theory Debunked**

Some have tried to insert millions of years into the genealogies by claiming there are "gaps"—that Genesis skips generations.

This doesn't work for several reasons:

### **Reason 1: The Text Gives Ages**

Notice the formula: "Adam lived 130 years and begot Seth." This is not saying "Adam lived 130 years and then somewhere in his lineage Seth was eventually born." It's saying Adam was 130 years old when Seth was born.

The same formula is used for every generation. The father's age is given at the son's birth. There's no room for gaps.

### **Reason 2: Jude 14 Confirms the Count**

"Now Enoch, the seventh from Adam, prophesied about these men..." (Jude 14)

Jude says Enoch was the seventh from Adam. Count them in Genesis 5: Adam, Seth, Enosh, Kenan, Mahalalel, Jared,

Enoch. Seven. No gaps. If there were skipped generations, the count would be wrong.

## **Reason 3: The Genealogies Are Too Detailed**

If Genesis wanted to give a symbolic genealogy, it wouldn't include ages. The fact that it records exact ages when sons were born shows it's meant to be chronological, not symbolic.

There are no gaps in Genesis 5. The timeline is straightforward.

## **Genesis 11: Noah to Abraham**

After the flood, Genesis 11 gives another detailed genealogy—this time from Noah's son Shem to Abraham.

"Shem lived one hundred years, and begot Arphaxad two years after the flood." (Genesis 11:10)

"Arphaxad lived thirty-five years, and begot Salah." (Genesis 11:12)

"Salah lived thirty years, and begot Eber." (Genesis 11:14)

Again, specific ages are given. Let's list them:

Total from the Flood to Abraham's birth:  
 $2 + 100 + 35 + 30 + 34 + 30 + 32 + 30 + 29 + 70 = 392$  years

Now we know:

Total: 2,048 years from Adam to Abraham.

## **Abraham to Present: Historical Record**

From Abraham forward, we have historical records. Abraham lived around 2000 BC (scholars place him anywhere from

2100-1900 BC; we'll use 2000 BC as an approximation).

From Abraham to Christ = ~2,000 years.

From Christ to present (2025 AD) = ~2,000 years.

So the total timeline is:

Grand Total: Approximately 6,000 years from creation to today.

## **James Ussher's Chronology**

In 1650, Archbishop James Ussher published a detailed chronology of Scripture. He analyzed the genealogies, cross-referenced historical events, and calculated that creation occurred in 4004 BC.

Ussher's date has been mocked by modern scholars—not because his methodology was flawed, but because it contradicts evolution's timeline. His work was thorough, based on the biblical text and extrabiblical historical records (Babylonian king lists, Egyptian chronologies, etc.).

Ussher's calculation: Creation in 4004 BC → Present (2025 AD) = ~6,029 years.

Other scholars who have independently worked through the biblical chronology arrive at similar dates—usually within a few hundred years. Whether it's 6,000 years or 6,500 years, it's nowhere close to millions.

### **EVIDENCE BOX: Independent Chronologies Agree**

Multiple chronologists have calculated the biblical timeline independently:

All fall within a range of 6,000-7,500 years ago. None support millions of years.

## What About "Yom" (Day)?

Some try to stretch Genesis 1 by arguing that the Hebrew word "yom" (day) doesn't always mean a 24-hour day. They claim the "days" of creation could be long ages.

This doesn't work for several reasons:

### **Reason 1: "Yom" + Number = Literal Day**

In Hebrew, whenever "yom" is used with a number (first day, second day, third day, etc.), it always means a literal day. There are no exceptions in the entire Old Testament.

Genesis uses "yom" with a number six times: day one, day two, day three, etc. These are literal days.

### **Reason 2: "Evening and Morning" Define the Day**

"And Elohim called the light Day, and the darkness He called Night. And the evening and the morning were the first day." (Genesis 1:5)

"Evening and morning" is the Hebrew way of describing a 24-hour cycle. This phrase is repeated for all six days. If Moses wanted to communicate long ages, he wouldn't use "evening and morning."

### **Reason 3: Exodus 20:11 Confirms Six Literal Days**

"For in six days Yahuah made the heavens and the earth, the sea, and all that is in them, and rested the seventh day. Therefore Yahuah blessed the Sabbath day and set it apart." (Exodus 20:11)

This is part of the Ten Commandments. Yahuah is giving the reason for the Sabbath command:because He created in six days and rested on the seventh.

If the creation "days" were long ages, the Sabbath command makes no sense. Are we supposed to work for six ages and rest for one age? No. The parallel only works if both sets of days are literal.

The creation week was six literal, 24-hour days.

## **The Church Fathers Believed in a Young Earth**

Before Darwin, the overwhelming consensus in the church was that the earth was young—around 6,000 years old.

This wasn't because they were ignorant or unscientific. It's because they read Genesis as written.

"The world was made in six days, it is now in the sixth thousand years... The world will exist six thousand years, and then comes the Sabbath of a thousand years."

— Irenaeus (2nd century),*Against Heresies*

"We have been taught that... the whole of time and the ages were completed in six days."

— Theophilus of Antioch (2nd century),*To Autolycus*

"For the whole time of our belief is not more than 5,769 years."

— Julius Africanus (3rd century)

The early church understood Genesis as literal history. The shift to "millions of years" didn't happen because of new biblical scholarship—it happened because of evolutionary pressure.

## Why Does This Matter?

Because the timeline isn't a minor detail. It's foundational.

If the earth is billions of years old, then death existed before Adam's sin. But Scripture says death entered the world through sin (Romans 5:12). If millions of years of death, disease, and extinction happened before Adam, then sin didn't bring death—death was already part of creation.

That destroys the gospel.

"Therefore, just as through one man sin entered the world, and death through sin, and thus death spread to all men, because all sinned..." (Romans 5:12)

If death came before sin, Paul is wrong. If Paul is wrong, the gospel collapses.

The age of the earth is not a side issue—it's a gospel issue.

Adam was real. The fall was real. Death came through sin. Yahusha came to undo what Adam did. If Genesis 1-3 is allegory, so is the gospel.

Scripture stands or falls together.

## Summary: The Biblical Timeline

Let's recap what we've established:

Total: ~6,000 years from creation to today.

There are no gaps for millions of years. The chronology is clear. The ages are specific. The days are literal.

Now the question becomes: Does the physical evidence support a young earth?

That's what we'll explore in the next chapter.

## CHAPTER 3: EVIDENCE FOR A YOUNG EARTH

We've established that Scripture teaches a young earth—approximately 6,000 years.

Now the question: Does the physical evidence support this?

The answer is yes. Overwhelmingly.

This chapter will present eight independent lines of scientific evidence—evidence that points to thousands of years, not billions. Evidence that has been documented, measured, and published in scientific journals. Evidence that contradicts the deep-time narrative.

And evidence that is systematically ignored or explained away because it doesn't fit the evolutionary story.

### 1. Helium in Zircon Crystals

Uranium decays into lead through a series of steps, releasing helium atoms in the process. This helium is a gas and escapes from crystals at measurable rates.

Zircon crystals contain uranium. If those crystals are billions of years old (as evolutionists claim), the helium should have long since escaped. But it hasn't.

The RATE project (Radioisotopes and the Age of The Earth), conducted by the Institute for Creation Research, measured helium retention in zircon crystals from deep boreholes in New Mexico. The results were stunning:

EVIDENCE BOX: Too Much Helium

Finding: Zircon crystals supposedly 1.5 billion years old still contained massive amounts of helium.

Problem: At measured diffusion rates, the helium should have escaped in less than 100,000 years.

Conclusion: The crystals cannot be billions of years old. They are thousands of years old.

Source: Humphreys et al., "Helium Diffusion Rates Support Accelerated Nuclear Decay," Proceedings of the Fifth International Conference on Creationism, 2003

This isn't speculation. This is measurement. Helium escapes from zircons at known rates. The fact that it's still there means the rocks are young.

Helium doesn't wait billions of years. It escapes. The presence of helium = young rocks.

## **2. Carbon-14 in Diamonds, Coal, and Dinosaur Bones**

Carbon-14 (C-14) is a radioactive isotope with a half-life of approximately 5,730 years. This means that after 5,730 years, half of the original C-14 has decayed. After another 5,730 years, half of what remained decays, and so on.

After about 100,000 years, C-14 should be completely undetectable—there should be none left.

Yet C-14 has been found in materials supposedly millions and billions of years old:

### **EVIDENCE BOX: C-14 Where It Shouldn't Be**

1. Diamonds (supposedly billions of years old):

Multiple studies have detected C-14 in diamonds. If the diamonds were even 1 million years old, there should be zero C-14. Yet it's there.

Source: Baumgardner et al., "Measurable 14C in Fossilized Organic Materials," Proceedings of the Fifth International Conference on Creationism, 2003

2. Coal (supposedly 100-300 million years old):

Coal samples from around the world have been tested. All contain detectable C-14.

3. Dinosaur Bones (supposedly 65+ million years old):

The Paleochronology Group has tested over a dozen dinosaur bone samples. All contained C-14.

Source: Miller et al., presented at American Geophysical Union conference, 2012

Evolutionists claim this is "contamination." But contamination doesn't explain consistent, repeatable results across multiple samples from different locations, tested by different labs.

C-14 in "ancient" materials = those materials are not ancient.

### **3. Soft Tissue in Dinosaur Bones**

This is the smoking gun.

In 2005, Dr. Mary Schweitzer (evolutionist paleontologist) discovered soft, pliable tissue in a *Tyrannosaurus rex* femur. Not mineralized. Not fossilized. Soft tissue—blood vessels, connective tissue, and what appeared to be red blood cells.

"The tissues are still soft, still transparent, still flexible."

— Mary Schweitzer, *Sciencemagazine*, 2005

This wasn't supposed to be possible. Soft tissue decays. Proteins break down. DNA degrades. There is no known mechanism for preserving soft tissue for 65 million years.

Since Schweitzer's discovery, soft tissue has been found in multiple dinosaur specimens:

Evolutionists have proposed that iron in the blood might preserve tissue (like formaldehyde). But experiments show this extends preservation to thousands of years at most—not millions.

Soft tissue cannot survive 65 million years. Its presence proves the bones are thousands of years old.

## 4. Earth's Magnetic Field Decay

The earth has a magnetic field, and it's measurably decaying. Since the 1800s, scientists have recorded the strength of the field, and it's losing approximately 5% of its strength every 100 years.

If you extrapolate backwards, the magnetic field would have been impossibly strong just 10,000-20,000 years ago. Go back millions of years, and the field would have been so strong that life couldn't exist.

### EVIDENCE BOX: Magnetic Field Decay

Measured decay rate:~5% per century

Implication:10,000 years ago, the field would have been twice as strong. 20,000 years ago, four times as strong.

Conclusion:The earth cannot be billions of years old. The magnetic field data points to thousands of years.

Source: Dr. Thomas Barnes, "Origin and Destiny of the Earth's Magnetic Field," ICR, 1983; Dr. Russell Humphreys, "The

Earth's Magnetic Field Is Young," Impact, ICR, 1993

Evolutionists propose that the field "reverses" periodically, resetting the decay. But there's no observational evidence for this, and no known mechanism that would allow it.

The decaying magnetic field is a clock pointing to a young earth.

## 5. Not Enough Salt in the Ocean

Rivers carry salt into the oceans at measurable rates. The oceans are salty, but not salty enough for billions of years of accumulation.

Scientists have calculated that at current rates, it would take approximately 62 million years to accumulate the salt currently in the ocean—far less than the supposed 3+ billion years the oceans have existed.

And even 62 million years assumes:

When you factor in removal mechanisms, the maximum age is much younger—consistent with thousands, not billions, of years.

The ocean's salt content is consistent with a young earth.

## 6. Erosion Rates and Continental Landmasses

Continents erode. Rain, wind, rivers, and ice wear away landmasses at measurable rates.

Current erosion rates indicate that the continents would be completely eroded flat in approximately 14 million years. Yet we have mountains. Tall mountains.

If the continents were billions of years old, they should have eroded and re-formed multiple times. Yet there's no evidence of

this.

#### EVIDENCE BOX: Erosion Problem

Measured erosion rate: Continents lose approximately 24 billion tons of sediment per year.

Calculation: At this rate, continents would erode flat in ~14 million years.

Problem: Continents supposedly billions of years old should not have mountains.

Source: Judson, "Erosion of the Land," American Scientist, 1968

Evolutionists argue that tectonic uplift replenishes the landmass. But the rates don't match. Erosion is faster.

The existence of high mountains is consistent with a young earth—not billions of years.

## 7. The Moon Is Receding

The moon is slowly moving away from the earth at a rate of about 3.8 centimeters per year. This is measurable using laser ranging.

If you extrapolate backwards, the moon would have been touching the earth approximately 1.4 billion years ago. But evolutionists claim the moon is 4.5 billion years old.

The numbers don't work.

Even worse: the closer the moon is to the earth, the stronger the tidal forces. If the moon were significantly closer in the past, the tidal forces would have been catastrophic—huge tides, massive oceanic disruption.

EVIDENCE BOX: Moon Recession

Current recession rate: 3.8 cm/year

Problem: Extrapolate back 1.4 billion years = moon touching earth. Evolutionists claim the moon is 4.5 billion years old.

Conclusion: The moon cannot be billions of years old.

Source: Bills & Ray, "Lunar Orbital Evolution: A Synthesis of Recent Results," Geophysical Research Letters, 1999

The moon's recession rate is consistent with thousands of years, not billions.

## 8. DNA Decay Rate

DNA breaks down over time. It's not stable indefinitely. Studies on DNA decay have shown that DNA has a half-life of approximately 521 years (under ideal conditions).

This means that even in perfect conditions, DNA becomes unreadable after about 6.8 million years.

Yet researchers have claimed to find DNA in fossils supposedly tens of millions of years old:

This is impossible if the fossils are as old as claimed.

EVIDENCE BOX: DNA Shouldn't Exist

DNA half-life: ~521 years (under ideal conditions)

Maximum survival time: ~6.8 million years (theoretical maximum)

Problem: DNA found in specimens supposedly 65-130 million years old.

Conclusion: The specimens cannot be millions of years old.

Source: Allentoft et al., "The half-life of DNA in bone," Proceedings of the Royal Society B, 2012

The presence of DNA in "ancient" fossils proves they are not ancient.

## Why Isn't This Common Knowledge?

You've just read eight independent lines of evidence—scientific, measurable, documented evidence—that the earth is young.

So why haven't you heard about this?

Because it contradicts the narrative. Because if the earth is young, evolution is impossible. And if evolution is impossible, there is a Creator.

These findings are published in scientific journals, but they're dismissed, ignored, or explained away with ad hoc rescue devices. The evidence is suppressed because the implications are unacceptable to the naturalistic worldview.

"For the wrath of Elohim is revealed from heaven against all wickedness and unrighteousness of men, whosuppress the truthin unrighteousness..." (Romans 1:18)

They suppress the truth. Not because the evidence is weak—but because accepting it would require submission to the Creator.

## Summary: Eight Witnesses to a Young Earth

Let's recap the evidence:

Eight independent witnesses. All pointing to the same conclusion: The earth is young.

In the next section, we'll explore what the pre-flood world was like—and why "dinosaurs" were simply reptiles living in extraordinary conditions.

## **PART 2: THE PRE-FLOOD WORLD**

Before the catastrophe—a world of giants, dragons, and conditions we can barely imagine

### **CHAPTER 4: THE FIRMAMENT**

The pre-flood world was radically different from our world today.

Scripture describes conditions before the flood that don't exist now—a "firmament" with "waters above" it, a world where humans lived 900+ years, where nephilim (giants) walked the earth, and where creatures grew to enormous sizes.

This chapter explores the firmament—what it was, what it did, and how it created the perfect environment for the pre-flood world.

### **Genesis 1:6-8 — The Waters Above**

"Then Elohim said, 'Let there be a firmament in the midst of the waters, and let it divide the waters from the waters.' Thus Elohim made the firmament, and divided the waters which were under the firmament from the waters which were above the firmament; and it was so. And Elohim called the firmament Heaven." (Genesis 1:6-8)

Read that carefully. Elohim created a firmament (Hebrew:raqia, from the root *raqaq* רָקַק, meaning "to beat out," "stamp," or "spread out"—like hammering metal into a sheet) and divided the waters:

The Hebrew word *raqia* implies not just an "expanse" but a solid, beaten-out structure. Job confirms this:

"Can you with Him spread out the skies, strong as a molten mirror?" (Job 37:18)

A molten mirror is solid, hard, reflective—not vapor or mist. The firmament was a structural barrier that physically separated the waters above from the waters below.

We have waters below. But where are the waters above?

They're gone. They fell during the flood when the barrier was breached.

## **The Flood Source: Above AND Below**

"In the six hundredth year of Noah's life, in the second month, the seventeenth day of the month, on that day all the fountains of the great deep were broken up, and the windows of heaven were opened. And the rain was on the earth forty days and forty nights." (Genesis 7:11-12)

The flood came from two sources:

Notice the precise language: the windows were opened, not "dissolved" or "evaporated." If the firmament is a solid structural barrier, the "windows of heaven" are literal openings—floodgates or sluice gates—that were unsealed to release the waters above.

This was not normal rain. This was not a vapor canopy collapsing. This was the controlled, catastrophic release of the massive water reserves held back by the firmament barrier.

## **What Was the Firmament?**

Based on the Hebrew word *raqia* (a beaten-out, solid structure) and the biblical description in Job 37:18 ("strong as a molten mirror"), the firmament was:

A solid, impenetrable barrier that enclosed the earth's atmosphere and held back the waters above.

## Why Not a Vapor Canopy?

The "vapor canopy" theory has a fatal flaw: the heat problem.

A layer of water vapor thick enough to hold the massive amount of water needed for the flood would trap enormous amounts of heat (greenhouse effect), potentially making the earth uninhabitable—like a runaway oven.

But if the firmament is a solid barrier, the waters above are physically separated from the atmosphere. They sit on top of or outside the barrier, not suspended in the air as vapor. This solves the heat problem entirely.

## The Solid Barrier Model

The firmament was a structural enclosure that:

This model is consistent with:

The pre-flood world was a literally enclosed, pressurized environment—radically different from today.

## Effects of the Firmament

### Effect 1: Increased Atmospheric Pressure

Here's the key insight: It is extremely difficult to pressurize an open system. Gas naturally dissipates into a vacuum (entropy). An open atmosphere floating in space would lose pressure over time.

But a solid, impenetrable barrier creates a sealed container. The pre-flood world was a literal hyperbaric chamber—an enclosed,

pressurized system.

This makes the physics of increased atmospheric pressure (perhaps 2-3 times current levels) much more plausible. Higher atmospheric pressure has profound effects on biology:

#### EVIDENCE BOX: Hyperbaric Oxygen Therapy

Modern medicine uses hyperbaric chambers (increased atmospheric pressure with high oxygen) to treat:

Higher pressure = faster healing, better cellular function.

If the pre-flood world had 2x atmospheric pressure, humans and animals would have experienced dramatically improved health and longevity.

## **Effect 2: Radiation Shielding**

The solid firmament barrier—along with the waters above it—would have filtered harmful radiation (cosmic rays, UV) from reaching the earth's surface.

Crucial distinction: In the vapor canopy model, water vapor in the atmosphere provides shielding (but causes overheating). In the solid barrier model, the barrier itself and the waters held outside the atmosphere provide radiation protection without the greenhouse heat problem.

Radiation damages DNA. Less radiation = less genetic damage = longer lifespans.

## **Effect 3: Global Greenhouse Climate**

The firmament would have created a uniform global temperature—warm from pole to pole, no ice caps, no deserts.

This explains:

The pre-flood earth was a paradise—stable climate, high oxygen, low radiation.

## **After the Flood: Everything Changed**

When the firmament was breached during the flood—when the "windows of heaven" were opened and the waters above were released—the earth lost its protective barrier and enclosed system. The results:

We're living in the post-flood wreckage of what was once a perfect, enclosed environment.

### **WHAT HAPPENED TO THE BARRIER?**

Scripture doesn't tell us the final state of the firmament barrier after the flood. Possibilities include:

What we know for certain: the enclosed, pressurized system that existed before the flood no longer functions. The protective effects—high pressure, radiation shielding, stable climate—are gone.

## **CHAPTER 5: EXTENDED LIFESPANS**

Before the flood, humans lived for centuries.

Adam: 930 years (Genesis 5:5)

Seth: 912 years (Genesis 5:8)

Methuselah: 969 years (Genesis 5:27)

Noah: 950 years (Genesis 9:29)

These aren't symbolic. They're chronological records. Scripture lists their ages at the births of their children, the length of their lives, and the year they died. This is history, not allegory.

But after the flood, something changed. Lifespans began to decline—rapidly.

## **The Decline After the Flood**

Look at the pattern:

Do you see the decline? From 950 years to 70 years in just a few generations.

By the time of Moses, Yahuah had set the new standard:

"The days of our lives are seventy years; and if by reason of strength they are eighty years..." (Psalm 90:10)

What changed?

## **Three Causes of the Decline**

### **Cause 1: Loss of the Firmament (Radiation Exposure)**

Before the flood, the solid firmament barrier—along with the waters above it—shielded the earth from cosmic radiation and UV rays. After the flood, when the barrier was breached, that protection was gone.

Radiation damages DNA. Damaged DNA = mutations = genetic degradation = shorter lifespans.

### **Cause 2: Decreased Atmospheric Pressure**

If the firmament barrier created an enclosed, pressurized system (as discussed in Chapter 4), its breach during the flood would have broken the seal and reduced pressure to current levels.

Lower pressure = less oxygen saturation = reduced cellular efficiency = aging accelerates.

## **Cause 3: Genetic Entropy**

Dr. John Sanford (geneticist, inventor of the gene gun) has documented a phenomenon called "genetic entropy"—the gradual degradation of the genome over time.

Mutations accumulate. Most are neutral or harmful. Beneficial mutations are exceedingly rare. Over generations, the genome degrades.

This is why lifespans declined after the flood. The human genome was pristine at creation. By Noah's time, it had degraded somewhat. After the flood (with increased radiation), degradation accelerated.

### **EVIDENCE BOX: Genetic Entropy Is Real**

Source: Dr. John Sanford, *Genetic Entropy and the Mystery of the Genome*, 2005

Key findings:

We're not evolving upward—we're degrading downward.

## **What This Means for Other Creatures**

If humans lived 900+ years before the flood, what about animals?

If the same environmental conditions (high pressure, low radiation, optimal climate) allowed humans to live longer, those conditions would also affect animals.

Consider reptiles.

Reptiles exhibit indeterminate growth—they never stop growing. They grow throughout their entire lives. The longer they live, the larger they get.

Now imagine a reptile living 500-900 years in pre-flood conditions.

You'd get a "dinosaur."

We'll explore this in the next chapter.

## **CHAPTER 6: REPTILES AND "DINOSAURS"**

The word "dinosaur" was invented in 1842 by Richard Owen, a British paleontologist. Before that, large reptilian creatures were called dragons.

Think about that. For thousands of years, every culture on earth had stories of dragons. Then in 1842, scientists invented a new word and told you dragons never existed—they were just myths.

But what if dragons did exist? What if "dinosaurs" are just reptiles that lived long lives in pre-flood conditions?

### **Reptiles Exhibit Indeterminate Growth**

Most animals exhibit determinate growth—they grow to a certain size and then stop. Humans, dogs, cats, birds—all stop growing at adulthood.

Reptiles are different. Reptiles exhibit indeterminate growth—they never stop growing. They grow throughout their entire lives.

**EVIDENCE BOX: Reptiles Never Stop Growing**

Scientific fact: Reptiles (snakes, lizards, crocodiles, alligators, turtles) grow continuously throughout their lives. Growth slows with age, but never stops.

Examples:

Source: Sebens, "The Ecology of Indeterminate Growth in Animals," Annual Review of Ecology and Systematics, 1987

So what happens if a reptile lives not 50 years, but 500 years? Or 900 years?

It gets massive. Dinosaur-sized.

## **Pre-Flood Conditions = Massive Reptiles**

Recall the pre-flood world:

In these conditions, reptiles would:

Result: Enormous reptiles. Creatures we now call dinosaurs.

A crocodile living 500 years in pre-flood conditions would dwarf modern crocodiles. A lizard living 700 years would be house-sized. This isn't speculation—this is biology.

## **"Dinosaur" Is a Modern Word**

The word "dinosaur" didn't exist until 1842. Richard Owen coined it from Greek words meaning "terrible lizard."

Before 1842, what were these creatures called?

Dragons.

Ancient texts describe dragons. Art depicts dragons. Legends tell of dragons. Every culture has dragon stories.

Then evolutionists discovered giant reptile bones, needed them to fit their "millions of years" narrative, so they invented a new category: dinosaurs. And they told you dragons were myths.

Dinosaurs are dragons. Dragons are large reptiles. And they lived alongside humans.

We'll prove this in the next chapter.

## **CHAPTER 7: DRAGONS IN HISTORY**

If "dinosaurs" lived millions of years ago and went extinct long before humans existed, why does every ancient culture have detailed descriptions of dragon-like creatures?

The answer is simple: because humans saw them.

This chapter presents evidence that humans and "dinosaurs" coexisted—evidence from Scripture, history, and ancient artwork.

### **Biblical References to Dragons**

#### **Job 40:15-24 — Behemoth**

"Look now at the behemoth, which I made along with you; he eats grass like an ox. See now, his strength is in his hips, and his power is in his stomach muscles. He moves his tail like a cedar; the sinews of his thighs are tightly knit. His bones are like beams of bronze, his ribs like bars of iron. He is the first of the ways of Elohim; only He who made him can bring near His sword." (Job 40:15-19)

Let's analyze this:

This matches the description of a sauropod dinosaur—long neck, massive body, huge tail, herbivore.

Some claim "behemoth" is a hippo or elephant. But neither has a tail "like a cedar." The description doesn't fit. It fits a sauropod.

## **Job 41 — Leviathan**

"Can you draw out Leviathan with a hook, or snare his tongue with a line which you lower? ...His rows of scales are his pride, shut up tightly as with a seal; one is so near another that no air can come between them...Out of his mouth go burning lights; sparks of fire shoot out. Smoke goes out of his nostrils, as from a boiling pot and burning rushes. His breath kindles coals, and a flame goes out of his mouth." (Job 41:1, 15-16, 19-21)

This describes:

Fire-breathing? Is that possible?

Yes. The bombardier beetle produces an explosive chemical reaction (hydrogen peroxide + hydroquinone) that shoots boiling liquid at enemies. If a beetle can do it, a larger creature with a similar mechanism could produce fire.

Leviathan matches descriptions of marine reptiles (plesiosaurs, mosasaurs) or possibly a large crocodilian with bio-chemical defense mechanisms.

## **Other Biblical References**

Scripture describes these creatures as real, physical animals—not allegories.

## **Historical Accounts from Non-Biblical Sources**

### **Herodotus (5th century BC) — Flying Serpents in Arabia**

"There is a place in Arabia... to which I went, on hearing of some winged serpents; and when I arrived there, I saw bones and spines of serpents, in such quantities as it would be impossible to describe. The form of the serpent is like that of a water-snake; but he has wings without feathers."

— Herodotus, Histories, Book II

Herodotus, the "Father of History," describes flying reptiles. He saw their bones. This is not mythology—this is eyewitness testimony from a historian.

## **Marco Polo (13th century) — Dragons in China**

"Here are found snakes and great serpents of such vast size as to strike fear into those who see them, and so hideous that the very account of them must excite the wonder of those who hear it."

— Marco Polo, describing creatures in the province of Karajan (modern Myanmar/China border)

Marco Polo describes enormous reptiles. Chinese history is filled with dragon accounts—detailed descriptions, art, and even dragon bones displayed in temples.

## **Alexander the Great — Dragon Encounters**

Ancient accounts of Alexander's campaigns describe encounters with large reptilian creatures in India and other regions. These were not viewed as mythical—they were documented as real animals.

## **Ancient Artwork Depicting "Dinosaurs"**

## **1. Bishop Bell's Tomb Brass (1496 AD)**

In Carlisle Cathedral, England, there is a brass memorial to Bishop Richard Bell (died 1496). Around the border are depictions of various animals—and two of them look unmistakably like sauropod dinosaurs (long necks, long tails, four legs).

How did a 15th-century artist accurately depict creatures that supposedly went extinct 65 million years before humans existed?

Answer: Because he saw them (or saw reliable descriptions).

## **2. Ta Prohm Temple, Cambodia — Stegosaurus Carving**

At Ta Prohm temple (12th century), there is a stone carving of what appears to be a stegosaurus—complete with plates along its back. This temple predates modern paleontology by centuries.

How did Cambodian artisans carve a recognizable stegosaurus?

Answer: They saw one.

## **3. Mesopotamian Cylinder Seals**

Ancient Mesopotamian cylinder seals (3000-1000 BC) depict creatures with long necks and tails resembling sauropods. These seals were used for official documents—not mythology.

## **4. Ica Stones, Peru**

Thousands of stones have been found in Peru depicting humans interacting with dinosaur-like creatures. Skeptics claim

they're hoaxes, but many were recovered from ancient Peruvian tombs.

## 5. Native American Petroglyphs

At Kachina Bridge in Utah, there is a petroglyph that appears to depict a sauropod dinosaur. The rock art is ancient, created by indigenous peoples long before modern paleontology.

## Every Culture Has Dragon Legends

Consider this:

Every continent. Every culture. All describing large reptilian creatures.

Either:

Option 2 is far more reasonable.

## Why Don't We See Them Today?

The same reason we don't see dodos, mammoths, or saber-toothed cats—extinction.

After the flood, the earth's climate changed. Food sources changed. Many species went extinct. Humans hunted large, dangerous creatures. Over centuries, dragon populations dwindled.

By the medieval period, dragons were rare. By the modern era, they were gone.

But humans remember. The legends persist because the encounters were real.

## CHAPTER 8: GIANTS AMONG MEN

Dragons weren't the only unusual creatures in the pre-flood world. There were giants.

Scripture is explicit:

"There were giants on the earth in those days, and also afterward, when the sons of Elohim came in to the daughters of men and they bore children to them. Those were the mighty men who were of old, men of renown." (Genesis 6:4)

The Hebrew word translated "giants" is Nephilim (נְפִילִים), which means "fallen ones." These were not normal humans. They were giants—physically enormous beings.

## **Post-Flood Giants in Scripture**

Giants didn't all die in the flood. Some genetic remnant survived through Noah's line, or perhaps the conditions that produced giants recurred briefly after the flood. Either way, Scripture records giants living after the flood:

## **Numbers 13:33 — Giants in Canaan**

"There we saw the giants (the descendants of Anak came from the giants); and we were like grasshoppers in our own sight, and so we were in their sight." (Numbers 13:33)

The Israelite spies saw giants in Canaan. They describe themselves as "grasshoppers" in comparison. This is not poetic exaggeration—this is eyewitness testimony.

## **Deuteronomy 3:11 — Og's Bed**

"For only Og king of Bashan remained of the remnant of the giants. Indeed his bedstead was an iron bedstead... nine cubits is its length and four cubits its width." (Deuteronomy 3:11)

Nine cubits = approximately 13.5 feet long. Four cubits = approximately 6 feet wide.

Og's bed was over 13 feet long. If the bed was sized for him (and beds typically are), Og was likely 10-12 feet tall.

## **1 Samuel 17 — Goliath**

"And a champion went out from the camp of the Philistines, named Goliath, from Gath, whose height was six cubits and a span." (1 Samuel 17:4)

Six cubits and a span = approximately 9 feet 9 inches tall.

Goliath was not the tallest giant mentioned. He's just the most famous. Scripture mentions other giants:

These aren't myths. These are historical records.

## **Physical Evidence: Giant Skeletons**

In the 1800s and early 1900s, newspapers across America reported discoveries of giant human skeletons—7 to 12 feet tall. These reports appeared in reputable newspapers:

### **EVIDENCE BOX: Newspaper Reports of Giant Skeletons**

Examples:

These reports describe skeletons 7-12 feet tall, with double rows of teeth, six fingers/toes, and elongated skulls.

So where are the skeletons now?

Most were sent to the Smithsonian Institution. And then... they disappeared.

## **The Smithsonian Cover-Up**

Researcher Jim Vieira has documented over 1,500 newspaper accounts of giant skeleton discoveries in North America. When he tried to locate the skeletons, he found they had been "lost" or "misplaced" by the Smithsonian.

In 2014, the Supreme Court ruled on a case involving the Smithsonian's destruction of evidence related to giant skeletons. The institution was forced to release classified documents admitting to the destruction of tens of thousands of giant human remains in the early 1900s.

Why would they destroy evidence?

Because it contradicts the evolutionary narrative.

If humans and giants coexisted—and if some of those giants were 10-12 feet tall—it validates the biblical account and destroys the "humans evolved from small primates" story.

The evidence was real. It was systematically destroyed.

## **Modern Giant Sightings**

Even today, there are isolated reports of unusually tall humans:

These are exceptions today. But if pre-flood conditions (high oxygen, low radiation, optimal environment) allowed all humans to live longer and grow larger, giants would have been common—not exceptions.

## **Why Did Giants Exist?**

Two possibilities:

### **Theory 1: Fallen Angel / Human Hybrid (Genesis 6:1-4)**

Genesis 6:1-4 describes "sons of Elohim" (interpreted by some as fallen angels) taking human wives and producing Nephilim (giants). This would explain their supernatural size and strength.

This interpretation is supported by:

## **Theory 2: Pre-Flood Optimal Conditions**

Even without supernatural intervention, pre-flood conditions (high oxygen, high atmospheric pressure, low radiation) would have allowed humans to grow larger. Just as reptiles grew to dinosaur size, humans may have grown to giant size.

Both theories may be partially true: optimal conditions + genetic corruption produced giants.

## **Why It Matters**

Giants validate the biblical account. If Scripture says there were giants, and we find 7-12 foot skeletons, Scripture is vindicated.

The fact that this evidence was systematically destroyed tells you everything you need to know about the suppression of truth.

They don't want you to know that the Bible is literal history.

In the next section, we'll examine the flood itself—the global catastrophe that buried this pre-flood world and created the fossil record.

## **PART 3: THE FLOOD**

The global catastrophe that buried the pre-flood world and created the fossil record

## **CHAPTER 9: THE FLOOD ACCOUNT**

Genesis 6-8 describes a flood. But not just any flood—a global, catastrophic deluge that destroyed all land-dwelling, air-breathing life except what was on the ark.

The language of Scripture is explicit. This was not a local flood in Mesopotamia. This was worldwide destruction.

## **The Language Demands Global**

"And Elohim said to Noah... 'behold, I Myself am bringing floodwaters on the earth, to destroy from under heaven all flesh in which is the breath of life; everything that is on the earth shall die.'" (Genesis 6:13, 17)

"And the waters prevailed exceedingly on the earth, and all the high hills under the whole heaven were covered. The waters prevailed fifteen cubits upward, and the mountains were covered." (Genesis 7:19-20)

"And all flesh died that moved on the earth: birds and cattle and beasts and every creeping thing that creeps on the earth, and every man. All in whose nostrils was the breath of the spirit of life, all that was on the dry land, died." (Genesis 7:21-22)

If words have meaning, this flood was global.

## **Why Not Local?**

Some theologians try to make the flood "local" to reconcile with evolutionary timelines. But this doesn't work:

The flood was global. Period.

## **Duration: Over One Year**

The flood wasn't "40 days of rain." The rain lasted 40 days, but the flood lasted over a year:

Total time on the ark: 371 days — just over one year.

This wasn't a brief rainstorm. This was a year-long catastrophe that reshaped the entire planet.

## **Every Culture Remembers**

If the flood was global, we'd expect flood legends in cultures worldwide. And we find exactly that:

Over 200 distinct flood legends have been documented worldwide. They share common elements:

Why would isolated cultures across every continent have the same story?

Because they all descended from Noah's family. They all remember the same event.

## **CHAPTER 10: FOUNTAINS OF THE GREAT DEEP**

Most people think the flood was just rain. Forty days and forty nights of rain, and that's it.

But Scripture tells a different story. The flood came from two sources—above and below:

"In the six hundredth year of Noah's life, in the second month, the seventeenth day of the month, on that day all the fountains of the great deep were broken up, and the windows of heaven were opened." (Genesis 7:11)

Notice the order: First, the fountains of the great deep broke up. Then the windows of heaven opened.

The primary source of floodwater was from inside the earth—not from the sky.

## Water Inside the Earth

For years, this sounded impossible to skeptics. "There's no water inside the earth!" they claimed.

Then in 2014, scientists discovered massive water reservoirs deep within the earth's mantle.

### EVIDENCE BOX: Water in Earth's Mantle

Discovery (2014): Scientists found a mineral called ringwoodite in the mantle transition zone (250-410 miles deep) that contains water in its crystal structure.

Amount: Estimates suggest there may be as much water trapped in the mantle as exists in all the world's oceans combined—possibly MORE.

Quote: "It's actually confirming that there is a very, very large amount of water that's trapped in a really distinct layer in the deep Earth." — Brandon Schmandt, University of New Mexico

Source: Pearson et al., "Hydrous mantle transition zone indicated by ringwoodite included within diamond," *Nature*, 2014

Genesis 7:11 was scientifically accurate thousands of years before modern geology discovered it.

## How the Fountains Broke Open

The "fountains of the great deep" suggests catastrophic rupturing of the earth's crust. Massive amounts of mineral-rich, superheated water exploded from beneath the surface.

This would have caused:

The floodwater wasn't just H~~2~~O—it was mineral-laden, superheated water capable of rapid petrification.

## Rapid Petrification

Fossilization requires specific conditions: rapid burial + mineral-rich water. You get both during a global flood with fountains of the deep.

Modern examples prove rapid petrification is possible:

### EVIDENCE BOX: Modern Rapid Petrification

Examples:

Fossilization doesn't require millions of years. It requires the right conditions—which the flood provided globally.

The fountains of the great deep provided exactly the conditions needed for rapid, global fossilization.

## CHAPTER 11: RAPID FOSSILIZATION

Evolutionists claim fossils form slowly over millions of years. Dead organism → gradual mineralization → fossil.

But the evidence shows the opposite: fossils form rapidly through catastrophic burial.

## Dead Things Don't Fossilize—They Decay

When an animal dies naturally, what happens?

Fossilization doesn't happen through slow processes. It requires:

Fossils require catastrophe, not time.

## Exquisite Preservation = Rapid Burial

Many fossils show exquisite detail—soft tissue imprints, delicate features, even stomach contents visible. This level of preservation is impossible with slow burial.

Examples:

#### EVIDENCE BOX: Fossils Showing Rapid Burial

1. Fish eating fish— Fossils show one fish in the act of swallowing another. Death and burial were instantaneous.
2. Ichthyosaur giving birth— Marine reptile fossilized mid-birth, baby halfway out. No time for slow burial.
3. Jellyfish fossils— Jellyfish are 95% water. They disintegrate within hours. Yet we find fossilized jellyfish. Only catastrophic burial explains this.
4. Trilobites in death poses— Fossilized curled up (defensive posture), indicating sudden burial while alive.

These fossils don't show slow, peaceful death. They show sudden catastrophe.

## Fossil Graveyards

Across the world, we find massive fossil graveyards—millions of creatures buried together in chaotic layers.

Examples:

These aren't peaceful cemeteries where animals died over millions of years. These are mass burial sites from catastrophic events.

Fossil graveyards are evidence of the flood, not slow processes.

## CHAPTER 12: POLYSTRATE FOSSILS

Here's a problem evolutionists can't explain: trees standing upright through multiple "millions of years" of rock layers.

They're called polystrate fossils (poly = many, strata = layers). These are fossils—usually trees—that extend vertically through multiple geological layers.

## **The Problem**

According to evolutionary geology, each rock layer represents thousands or millions of years. The layers stacked on top of each other supposedly show the passage of vast time.

But if a tree trunk extends through multiple layers, there's a problem:

How did the tree remain standing for millions of years without rotting?

It didn't. The layers were deposited rapidly—fast enough that the tree was buried before it could decay.

## **Examples of Polystrate Fossils**

### **EVIDENCE BOX: Polystrate Tree Fossils**

1. Joggins Cliffs, Nova Scotia— Trees up to 40 feet tall extending through multiple coal layers. These layers supposedly represent millions of years, yet the trees stand intact.
2. Yellowstone National Park— "Petrified forests" with trees stacked in multiple layers. Geologists claim each layer is a separate forest buried over thousands of years. But the trees extend through the layers—impossible if time passed between depositions.
3. Coal mines worldwide— Miners frequently encounter tree trunks extending through coal seams and overlying rock. Coal

supposedly forms over millions of years, yet trees stand through the entire process?

The only explanation: rapid deposition. The layers formed quickly—during a catastrophic flood—before the trees could rot.

## **Evolutionary Explanations Don't Work**

Evolutionists have tried to explain polystrate fossils:

Claim 1: "The trees grew up through the sediment as it was deposited."

Problem: Trees don't grow through rock. And if sediment was depositing around the tree, the tree would be buried and die. It wouldn't keep growing upward through successive "millions of years" of layers.

Claim 2: "Each layer represents a quick deposition event, not millions of years."

Response: Exactly. That's what flood geologists have been saying. If you admit rapid deposition, you've abandoned uniformitarianism and admitted catastrophism—which supports the flood.

Polystrate fossils are devastating to slow-and-gradual geology. They prove rapid, catastrophic deposition.

## **CHAPTER 13: THE GEOLOGIC COLUMN REINTERPRETED**

The "geologic column" is the diagram showing layers of rock stacked in order: Cambrian, Ordovician, Silurian, Devonian, etc. It's presented as proof of millions of years.

But there's a secret they don't tell you: the complete geologic column doesn't exist anywhere on earth.

## **The Column Is Theoretical**

The geologic column was created in the 1800s by piecing together rock layers from different locations. Geologist A found these layers in England. Geologist B found those layers in Germany. They assembled them into a theoretical "complete" sequence.

But nowhere on earth can you find all the layers in the order shown in textbooks.

### **EVIDENCE BOX: Missing Geologic Column**

Fact: The complete geologic column exists only in textbooks and museums. In the real world:

So how can evolutionists claim the column proves millions of years when the column doesn't actually exist as a complete stack anywhere?

Because it's a theoretical construct, not an observation.

## **Flood Model: Layers = Stages of the Flood**

Flood geology offers a better explanation: the layers represent stages of a single catastrophic event, not ages of time.

As the floodwaters rose and receded, creatures were buried in a predictable order:

## **Stage 1: Marine Creatures (Bottom Layers)**

The first to be buried were sea-floor dwellers: trilobites, shellfish, corals. They lived at the bottom of the ocean and were buried first when sediment began depositing.

Result: Cambrian layer filled with marine invertebrates.

## **Stage 2: Fish and Amphibians (Middle Layers)**

As waters rose and currents intensified, fish and amphibious creatures were buried next.

Result: Devonian and Carboniferous layers with fish, amphibians, and early reptiles.

## **Stage 3: Reptiles and Mammals (Upper Layers)**

Land animals capable of fleeing to higher ground lasted longer before being overwhelmed. Larger, more mobile creatures could escape temporarily but were eventually buried.

Result: Mesozoic and Cenozoic layers with dinosaurs, mammals, and birds.

## **Stage 4: Humans and Modern Animals (Rarest Fossils)**

Humans and intelligent mammals would have fled to the highest ground, built rafts, climbed trees. They were buried last—and often not buried at all (bodies floated and decayed).

Result: Human fossils are rare in the geologic column.

The geologic column is not a record of evolution over millions of years—it's a record of burial order during the flood.

## **Marine Fossils on Mountains**

If the flood covered the whole earth, we'd expect to find marine fossils on mountaintops. And we do:

Evolutionists claim the mountains were once underwater, then slowly uplifted over millions of years. But the evidence shows rapid uplift during/after the flood as tectonic plates shifted catastrophically.

## **CHAPTER 14: SEDIMENTARY LAYERS = RAPID DEPOSITION**

Sedimentary rock covers most of the earth's surface. These are layers of sediment (sand, mud, silt) that hardened into rock.

Evolutionists claim these layers took millions of years to form—slow, gradual deposition.

But the evidence shows rapid, catastrophic deposition.

### **Mount St. Helens: Layers in Hours**

On May 18, 1980, Mount St. Helens erupted. The blast and subsequent mudflows created geological features that evolutionists claim take millions of years.

What happened:

#### **EVIDENCE BOX: Mount St. Helens Rapid Geology**

Layered strata formed in hours: The eruption deposited up to 600 feet of finely layered sediment in a single day. Each layer looks like it "should" represent years of deposition, but all formed rapidly.

Canyon carved in days: A mudflow carved a canyon system up to 140 feet deep through solid rock in less than a day. The canyon looks like a "mini Grand Canyon." Evolutionists claim the Grand Canyon took millions of years. Mount St. Helens showed canyons form rapidly.

Petrified wood in decades: Wood buried by the eruption has begun petrifying in just 40 years—far faster than "millions of years" models predict.

Source: Dr. Steven Austin, "Mount St. Helens: Explosive Evidence for Catastrophe," ICR, 1990s

Mount St. Helens proved catastrophic processes can produce in hours/days what evolutionists claim takes millennia.

## **Flat Contacts Between Layers**

If millions of years passed between rock layers, we'd expect erosion, weathering, and irregular surfaces between layers.

But we find flat, smooth contacts—no erosion, no soil layers, no root systems, no evidence of time passing.

This indicates continuous deposition—one layer after another without significant time gaps.

## **Soft Sediment Deformation**

Many rock layers show evidence of being bent and folded while still soft. If the layers had hardened over millions of years, they would have fractured when bent. Instead, they folded like soft clay.

Example: The Kaibab Plateau (Grand Canyon) shows massive folds in rock layers with no fracturing. The layers were bent while still soft—shortly after deposition.

Sedimentary layers show rapid deposition during a catastrophic flood, not slow accumulation over millions of years.

# **CHAPTER 15: THE GRAND CANYON**

The Grand Canyon is often presented as proof of millions of years: "Look how long it took for the Colorado River to carve this canyon!"

But there are serious problems with the slow-and-gradual story.

## **Problems with the Standard Story**

### **Problem 1: The River Is Too Small**

The Colorado River is tiny compared to the canyon. It supposedly carved over a mile deep and up to 18 miles wide. But the current river doesn't have the erosive power to accomplish this.

### **Problem 2: The River Flows Uphill**

In places, the Colorado River flows through areas where the elevation of the riverbed is higher than the surrounding plateau. Water doesn't naturally flow uphill. How did it carve through elevated sections?

### **Problem 3: No Delta**

If the river carved the canyon over millions of years, where's the delta? Rivers deposit sediment at their mouths. The Colorado River supposedly eroded a billion cubic miles of rock. Where's the massive sediment deposit?

There isn't one. The sediment is gone—carried away during a catastrophic drainage event.

## **Catastrophic Formation Model**

Flood geologists propose the Grand Canyon formed rapidly when massive lakes (formed during the flood) breached natural dams and drained catastrophically.

Evidence:

#### EVIDENCE BOX: Grand Canyon Rapid Formation

1. Lake deposits above the canyon— Sediment layers above the canyon show evidence of large lakes that once existed.
2. Breached dam theory— When natural dams broke, the water would have carved the canyon in days/weeks, not millions of years.
3. Mount St. Helens comparison— Small-scale canyon carved in ONE DAY during mudflow. If a small event can carve a canyon in a day, a massive flood can carve the Grand Canyon rapidly.
4. Lack of erosion between layers— The canyon walls show flat contacts between layers. If millions of years passed, there should be erosion between each layer. There isn't.

The Grand Canyon was carved rapidly during catastrophic water drainage after the flood—not slowly over millions of years.

## **PART 4: THE ARK**

The vessel that saved humanity—and the physical evidence that it still exists

## **CHAPTER 16: THE ARK'S SPECIFICATIONS**

Skeptics love to mock Noah's Ark. "How could all the animals fit?" "How could a wooden boat survive a global flood?" "The whole story is impossible!"

But when you examine the specifications Scripture gives, the ark was an engineering marvel—perfectly designed for its purpose.

## The Dimensions

"And this is how you shall make it: The length of the ark shall be three hundred cubits, its width fifty cubits, and its height thirty cubits." (Genesis 6:15)

A cubit is approximately 18 inches (the length from elbow to fingertip). So:

Total volume: Approximately 1.5 million cubic feet—equivalent to 569 modern railroad boxcars.

That's massive. This wasn't a little boat. This was a floating warehouse.

## The Shape: Optimized for Stability

The ark's dimensions give a length-to-width ratio of 6:1. Modern naval architects have tested this ratio and found it provides optimal stability for a large vessel.

### EVIDENCE BOX: Korean Naval Study

In 1993, researchers at Korea's KAIST (Korea Advanced Institute of Science and Technology) conducted a study on the ark's seaworthiness.

Findings:

Source: Hong et al., "Safety Investigation of Noah's Ark in a Seaway," Journal of Creation, 1994

The ark wasn't designed to sail somewhere. It was designed to survive—to float and remain stable in catastrophic waters. And the design was perfect for that purpose.

## Three Decks

"Make it with lower, second, and third decks." (Genesis 6:16)

Three full decks = approximately 100,000 square feet of floor space (about 20 basketball courts).

Plenty of room for animals, food storage, and living quarters for Noah's family.

## **The Window and Door**

"You shall make a window for the ark, and you shall finish it to a cubit from above; and set the door of the ark in its side." (Genesis 6:16)

The ark had ventilation (window) and a single entrance (door). Yahuah shut the door (Genesis 7:16)—once inside, there was no exit until the flood was over.

The ark was seaworthy, spacious, and perfectly designed. Not mythology—engineering.

## **CHAPTER 17: ANIMALS ON THE ARK**

"How did Noah fit all the animals on the ark?"

This is the #1 objection to the flood account. Skeptics imagine Noah cramming millions of species into a tiny boat—elephants, giraffes, every species of beetle, every variety of fish.

But this misunderstands what Scripture actually says.

## **Kinds, Not Species**

"And of every living thing of all flesh you shall bring two of every sort into the ark, to keep them alive with you; they shall be male and female. Of the birds after their kind, of animals after their kind, and of every creeping thing of the earth after its kind, two of every kind will come to you, to keep them alive." (Genesis

6:19-20)

Notice:"after their kind"(Hebrew:min).

Noah didn't need every species. He needed representatives of each kind.

## What's a "Kind"?

A "kind" is roughly equivalent to a family in modern taxonomy. All the genetic diversity within that family was present in the original pair (or seven pairs for clean animals).

Examples:

The genetic information was already there. After the flood, populations diversified into the species we see today. This is variation within a kind—not evolution between kinds.

## How Many Kinds?

Baraminology (the study of created kinds) estimates there were approximately 1,000-2,000 land animal kinds that needed to be on the ark.

Why so few?

### EVIDENCE BOX: Space Calculations

Assumption: 2,000 land animal kinds (generous estimate)

Clean animals: 7 pairs (Genesis 7:2) =  $\sim 700$  kinds  $\times 14 = 9,800$  animals

Unclean animals: 2 each =  $\sim 1,300$  kinds  $\times 2 = 2,600$  animals

Total animals:  $\sim 12,400$

Average animal size: Most animals are small (rodent-sized). Even large animals like elephants could be taken as juveniles.

Space required: Even generously assuming each animal needs 10 square feet, that's 124,000 square feet—easily fits within the ark's 100,000 square feet of floor space (and there were three decks).

Source: John Woodmorappe, "Noah's Ark: A Feasibility Study," 1996

The ark had more than enough room. The "too many animals" objection is based on a misunderstanding of what Scripture requires.

## **Food and Water**

Critic: "How did they store enough food for a year?"

Answer: Easily. The ark had massive cargo capacity. Dried grains, hay, and preserved foods would have been sufficient. And if animals hibernated (many animals do in stressful conditions), food requirements would have been minimal.

## **Yahuah Brought the Animals**

"...two of every kind will come to you, to keep them alive." (Genesis 6:20)

Noah didn't have to go capture animals. They came to him. This was a supernatural event—Yahuah directed the animals to the ark.

The ark was feasible. The animals fit. The food was manageable. The account is not mythology—it's history.

## **CHAPTER 18: THE ARK DISCOVERY**

For centuries, explorers have searched for Noah's Ark on Mount Ararat in Turkey. And they've found it.

## Where Did the Ark Land?

"Then the ark rested in the seventh month, the seventeenth day of the month, on the mountains of Ararat." (Genesis 8:4)

Not "Mount Ararat" singular—"mountains of Ararat" (plural). This refers to the Ararat mountain range in eastern Turkey.

## The Durupinar Site

In 1959, Turkish army captain İlhan Durupınar discovered a boat-shaped formation near Mount Ararat. Aerial photographs showed a distinct, symmetrical shape that looked exactly like a massive boat.

Key facts:

### EVIDENCE BOX: Durupinar Site

Location: Approximately 15 miles from Mount Ararat, in the mountains of Ararat region

Dimensions:

Ground-Penetrating Radar: Scans in the 1980s showed regular internal structures consistent with chambers/compartments

Metal Detection: Metal detector readings showed iron concentrations in regular patterns (possibly metal brackets/nails)

Petrified Wood: Samples tested showed petrified wood with cellular structure visible under microscope

## Turkish Government Recognition

In 1987, the Turkish government officially recognized the site as Noah's Ark and established it as a national park: "Noah's Ark National Park."

Visitors can walk on the formation today. Information plaques describe it as the remains of Noah's Ark.

## **Anchor Stones**

Large, drilled stones (weighing several tons each) have been found in the region. These stones have holes drilled through them and are carved with crosses and inscriptions.

Ancient mariners used drilled stones as anchors. If the ark used anchor stones to stabilize during the flood, finding them near the ark's resting place makes sense.

## **Why the Skepticism?**

Despite the evidence, many archaeologists and geologists reject the Durupinar site as the ark. Why?

Because accepting it would validate the biblical account.

If the ark exists, the flood happened. If the flood happened, evolution's timeline collapses. The implications are unacceptable to naturalistic scholars.

The ark has been found. The evidence is there. But those who suppress the truth will never admit it.

## **PART 5: THE COVER-UP**

"For the wrath of Yahuah is revealed from heaven against all ungodliness and unrighteousness of men, who suppress the truth in unrighteousness."— Romans 1:18

## **CHAPTER 19: WHY THEY SUPPRESS THE EVIDENCE**

The evidence for a young earth, a global flood, and the recent coexistence of humans and dinosaurs is overwhelming. We've examined fossil formations, soft tissue discoveries, polystrate trees, sedimentary layers, canyon formation, and the ark itself.

Yet mainstream science refuses to acknowledge any of it.

The question is not "Is there evidence?" The evidence is abundant. The question is: Why is the evidence suppressed?

### **Romans 1:18-22 — The Diagnosis**

"For the wrath of Yahuah is revealed from heaven against all ungodliness and unrighteousness of men, who suppress the truth in unrighteousness, because what may be known of Yahuah is manifest in them, for Yahuah has shown it to them. For since the creation of the world His invisible attributes are clearly seen, being understood by the things that are made, even His eternal power and Elohim-head, so that they are without excuse, because, although they knew Yahuah, they did not glorify Him as Yahuah, nor were thankful, but became futile in their thoughts, and their foolish hearts were darkened. Professing to be wise, they became fools."

— Romans 1:18-22 (NKJV, names corrected)

This passage gives us the biblical explanation for why the evidence is ignored:

The suppression of evidence is a spiritual issue, not a scientific one.

### **Evolution as a Religious Position**

Evolution is not science. It is a religious belief system designed to explain origins without Yahua.

"Evolution is a religion. This was true of evolution in the beginning, and it is true of evolution still today."

— Michael Ruse, philosopher of science, "How Evolution Became a Religion," National Post, May 13, 2000

"We take the side of science in spite of the patent absurdity of some of its constructs... in spite of the tolerance of the scientific community for unsubstantiated just-so stories, because we have a prior commitment, a commitment to materialism... Moreover, that materialism is absolute, for we cannot allow a Divine Foot in the door."

— Richard Lewontin, geneticist, "Billions and Billions of Demons," The New York Review of Books, January 9, 1997

Notice what Lewontin admits:"We cannot allow a Divine Foot in the door."

This is not a statement about evidence. It is a statement about philosophy. The commitment to materialism (the belief that only matter exists, and there is no Creator) is "absolute." Evidence that points to a Creator is rejected before it is examined.

This is what Scripture calls "suppressing the truth in unrighteousness."

## **The Fear of Implications**

Why the desperate need to suppress evidence for creation and the flood?

Because if the biblical account is true, everything changes.

If the earth is young:

If the flood was global:

If dinosaurs lived recently:

The implications are unacceptable to those committed to naturalism.

Acknowledging the evidence would require acknowledging the Creator. And acknowledging the Creator would require acknowledging His authority, His law, and His coming judgment.

"But they deliberately forget that long ago by Yahuah's word the heavens came into being and the earth was formed out of water and by water. By these waters also the world of that time was deluged and destroyed. By the same word the present heavens and earth are reserved for fire, being kept for the day of judgment and destruction of the ungodly."

— 2 Peter 3:5-7 (NIV, names corrected)

Peter connects the denial of the flood with the denial of coming judgment. Those who reject the evidence of the past flood do so because they do not want to face the reality of the future judgment.

## **Academic Persecution for Questioning Evolution**

The suppression is not passive. It is enforced through academic intimidation, career destruction, and institutional censorship.

Scientists who question evolution—even those with stellar credentials—face immediate backlash.

### **EVIDENCE BOX: Academic Censorship**

Case 1: Dr. Günter Bechly— German paleontologist, curator at Stuttgart State Museum of Natural History. After expressing

support for intelligent design, his display on evolution was removed from the museum, and he was pressured to resign.

Case 2: Dr. Caroline Crocker— Immunologist at George Mason University. Presented scientific problems with Darwinian evolution in a class. Lost her teaching position.

Case 3: Dr. Richard Sternberg— Evolutionary biologist, editor of Proceedings of the Biological Society of Washington. Published a peer-reviewed article supportive of intelligent design. Subjected to hostile work environment at Smithsonian, denied office access, and pushed out of his position.

Source: "Expelled: No Intelligence Allowed" (documentary, 2008); Discovery Institute case files

EVIDENCE BOX: Mark Armitage — Dinosaur Soft Tissue Discovery

Who: Mark Armitage, microscopist with 30+ years of experience, published in peer-reviewed journals.

What He Found: Soft tissue in a Triceratops horn, including osteocytes, collagen, and unfossilized bone. Published in Acta Histochemica (2013).

What Happened: Terminated from his position at California State University, Northridge. Lawsuit filed; university settled out of court for \$399,500.

Why It Matters: Soft tissue cannot survive millions of years. His discovery supports a young earth. His termination shows the intolerance for evidence that contradicts the evolutionary timeline.

Source: Armitage, M.H. & Anderson, K.L., "Soft sheets of fibrillar bone from a fossil of the supraorbital horn of the dinosaur Triceratops horridus," Acta Histochemica 115.6 (2013); legal case settlement public record

This is not how science is supposed to work.

In true science, evidence is examined objectively. Hypotheses are tested. Dissent is welcomed. Debate refines understanding.

But in the religion of evolution, dissent is heresy. Questioning the narrative results in career destruction. Evidence that contradicts the orthodoxy is ignored, ridiculed, or censored.

## **Media Complicity**

The media reinforces the evolutionary narrative at every turn.

The narrative is controlled. The questions that threaten the narrative are never asked.

## **Education System Indoctrination**

Children are taught evolution as fact from elementary school onward.

The result? Generations of people who have never heard the evidence for creation, who have been conditioned to believe that "science has disproven the Bible," and who dismiss biblical history without ever examining the facts.

## **The Strategy: Ridicule, Not Refutation**

Notice the pattern:

Why?

Because the evidence cannot be refuted.

Polystrate fossils exist. Soft tissue has been found in dinosaur bones. Carbon-14 is present in coal, diamonds, and dinosaur fossils. Sedimentary layers show rapid deposition. The Grand Canyon was carved quickly. Human and dinosaur footprints

appear together.

None of this can be explained within an evolutionary framework. So instead of addressing the evidence, they attack the messengers.

"Ridicule is the only weapon which can be used against unintelligible propositions."

— Thomas Jefferson (though the quote is used ironically here: the evolutionary position is the unintelligible one, yet it uses ridicule to silence critique)

## **Follow the Money**

There is a financial incentive to maintain the evolutionary narrative.

The system is entrenched. Changing it would cost money, careers, and reputations.

## **The Spiritual Dimension**

Behind all the academic, media, and financial incentives is a deeper reality:spiritual warfare.

"For we do not wrestle against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this age, against spiritual hosts of wickedness in the heavenly places."

— Ephesians 6:12

Satan's strategy from the beginning has been to undermine Yahuah's Word.

In the garden:"Has Yahuah indeed said...?"(Genesis 3:1)

In academia today: "Has Yahuah indeed created in six days? Did a flood really cover the earth? Did dinosaurs really live recently?"

The enemy knows that if he can convince people that Genesis is myth, he can convince them that the rest of Scripture is unreliable. If the foundation is destroyed, the entire structure collapses.

The suppression of evidence is not ultimately about science. It is about rebellion against the Creator.

## **Conclusion: The Emperor Has No Clothes**

The evolutionary establishment is like the emperor in the old fable—naked, but pretending to be clothed, and punishing anyone who points out the obvious.

Yet the narrative persists because admitting the truth would require admitting accountability to the Creator.

But the truth will not stay hidden forever.

"For nothing is secret that will not be revealed, nor anything hidden that will not be known and come to light."

— Luke 8:17

The evidence is there. The question is: will you believe it?

## **CHAPTER 20: SOFT TISSUE — THE SMOKING GUN**

If dinosaurs died 65 million years ago, their bones should be completely mineralized. No organic material should remain. Soft tissue—blood vessels, proteins, collagen, DNA fragments—cannot survive for millions of years.

Yet soft tissue has been found in dinosaur bones.

This discovery is devastating to the evolutionary timeline. It is the smoking gun that proves dinosaurs lived recently.

## **Mary Schweitzer's Discovery (2005)**

In 2005, paleontologist Dr. Mary Schweitzer made a discovery that shocked the scientific world.

While examining a *Tyrannosaurus rex* femur (thigh bone) from Montana, her team dissolved away the mineralized portion of the bone to examine what remained. What they found was impossible—soft, flexible tissue.

### **EVIDENCE BOX: Schweitzer's T. rex Soft Tissue**

#### **What Was Found:**

**Dating:** The dinosaur fossil was claimed to be 68 million years old.

**Problem:** Soft tissue and proteins decay rapidly. Even under ideal preservation conditions, collagen has a maximum shelf life of thousands of years—not millions.

**Source:** Schweitzer, M.H. et al., "Soft-Tissue Vessels and Cellular Preservation in *Tyrannosaurus rex*," *Science* 307.5717 (2005): 1952-1955

Schweitzer herself was stunned. In an interview, she said:

"I got goose bumps. It was exactly like looking at a slice of modern bone. But, of course, I couldn't believe it... The lab technician looked at me and said, 'Do you realize what you've got?' I said, 'I know. But we can't say that.' I said, 'We have to have some other explanation.'"

— Dr. Mary Schweitzer, quoted in "Schweitzer's Dangerous Discovery," Smithsonian Magazine, May 2006

Notice her response: "We can't say that."

Why not? Because the implications were unacceptable. If the tissue is soft, the dinosaur died recently. If the dinosaur died recently, the evolutionary timeline collapses.

Rather than questioning the age of the fossil, the scientific community scrambled to explain how soft tissue could survive for 68 million years.

## **The "Iron Preservation" Hypothesis**

In 2013, Schweitzer proposed a hypothesis: iron from the dinosaur's blood acted as a preservative, allowing soft tissue to survive for millions of years.

"Iron is an element that is present in abundance in the body, particularly in the blood, where it is part of the hemoglobin molecule... After death, iron is released and can participate in reactions that generate free radicals. These free radicals cause proteins and cell membranes to tie up together in a way that makes them less reactive."

— Schweitzer, M.H. et al., "A role for iron and oxygen chemistry in preserving soft tissues, cells and molecules from deep time," Proceedings of the Royal Society B 281.1775 (2014)

Problems with this hypothesis:

The "iron preservation" hypothesis is an ad hoc rescue device—a theory invented to save the evolutionary timeline, not one derived from evidence.

## **More Soft Tissue Discoveries**

Schweitzer's discovery was not isolated. Soft tissue has now been found in dozens of dinosaur fossils.

#### EVIDENCE BOX: Partial List of Soft Tissue Discoveries

See Appendix C for comprehensive list with citations.

This is not rare. This is a pattern.

Soft tissue is being found regularly because scientists are now looking for it. For decades, no one bothered to check because they assumed it couldn't be there. Now that they're checking, they're finding it everywhere.

## What the Textbooks Don't Tell You

Ask the average person what happens to a dead animal.

Answer: It decays.

Soft tissue rots. Bacteria consume it. Scavengers eat it. Within weeks or months (depending on the environment), nothing remains but bones. And even bones eventually break down.

Soft tissue does not last millions of years.

This is not controversial. It is basic biology.

Yet we are being asked to believe that dinosaur blood vessels remained flexible for 68 million years.

This is absurd.

## The Obvious Explanation

There is a much simpler explanation for why soft tissue is found in dinosaur bones:

The dinosaurs died recently.

Not 65 million years ago. Thousands of years ago. In the flood, approximately 4,350 years ago.

Soft tissue in dinosaur bones makes perfect sense in a young earth model:

This explanation requires no ad hoc hypotheses. It fits the evidence perfectly.

## Why the Resistance?

If soft tissue proves dinosaurs are young, why don't scientists accept this conclusion?

Because it would destroy the entire evolutionary framework.

Admitting dinosaurs are young means:

These implications are unacceptable to those committed to naturalism. So instead of following the evidence, they invent increasingly implausible explanations to preserve their worldview.

## The Data Speaks

Consider what has been found in "ancient" dinosaur bones:

The claimed age exceeds the maximum survival time by a factor of thousands to millions.

This is not a minor discrepancy. This is an impossibility being treated as fact.

## Schweitzer's Courage and Caution

To her credit, Dr. Mary Schweitzer published her findings despite knowing the backlash she would face. She has been attacked, ridiculed, and accused of contamination (even though

her lab procedures were rigorous and her findings have been replicated).

But she remains committed to an old earth. In interviews, she defends the millions-of-years timeline and insists that her discoveries do not challenge it.

Why?

Because in the current academic climate, questioning the age of dinosaurs is career suicide.

Schweitzer knows this. She has seen what happens to scientists who challenge the paradigm (see Chapter 19). So she walks a tightrope: publishing the evidence while refusing to draw the obvious conclusion.

"I'm not attacking the conventional theory. I'm just asking: What is the conventional theory based on? Where are the experiments?"

— Dr. Mary Schweitzer, Smithsonian Magazine, May 2006

Even this mild questioning brought fierce opposition. Imagine what would happen if she openly advocated for a young earth.

## **The Smoking Gun**

Soft tissue in dinosaur bones is the smoking gun.

It cannot be explained within an evolutionary framework. Every attempt to do so requires special pleading, ad hoc hypotheses, and the suspension of known biological laws.

The straightforward explanation is that the dinosaurs are not millions of years old.

They died in the flood. They were buried rapidly. Their bones are thousands of years old, not millions.

The evidence is clear. The question is whether you will accept it.

## CHAPTER 21: CARBON-14 WHERE IT SHOULDN'T BE

Carbon-14 dating is one of the most well-known methods for determining the age of organic materials. Museums, textbooks, and documentaries regularly cite C-14 dates as proof of millions of years.

But there's a problem.

Carbon-14 has been found in coal, diamonds, and dinosaur fossils—materials claimed to be tens to hundreds of millions of years old.

This is impossible if they are as old as claimed. Carbon-14 decays too quickly. If it's there, the samples cannot be millions of years old.

### What Is Carbon-14 Dating?

Carbon-14 (C-14) is a radioactive isotope of carbon. It forms in the atmosphere when cosmic rays strike nitrogen atoms. Living organisms absorb C-14 from the atmosphere (through photosynthesis or eating plants). When the organism dies, it stops absorbing C-14, and the C-14 it contains begins to decay.

Half-Life of C-14: 5,730 years

This means:

Even with the most sensitive equipment (Accelerator Mass Spectrometry), the detection limit is about 100,000 years. Beyond that, there is simply no C-14 left to measure.

EVIDENCE BOX: C-14 Detection Limits

Fact: After 100,000 years, C-14 is completely gone—undetectable even with the most advanced equipment.

Implication: If a sample contains measurable C-14, it cannot be older than 100,000 years. Period.

Source: Taylor, R.E., "Radiocarbon Dating: An Archaeological Perspective," Academic Press (1987)

## **The Problem: C-14 in "Ancient" Fossils**

Coal is claimed to be 50-300 million years old. Diamonds are claimed to be hundreds of millions to billions of years old. Dinosaur fossils are claimed to be 65-200 million years old.

Yet all of them contain measurable amounts of C-14.

This should be impossible.

## **The RATE Project (Radioisotopes and the Age of The Earth)**

In the 1990s, a team of creation scientists conducted a comprehensive study of radiometric dating methods. Known as the RATE project, it included some of the top experts in the field, including PhD physicists and geologists.

One of their findings was explosive: C-14 was present in every sample of coal and diamond they tested.

### **EVIDENCE BOX: RATE Project Findings on Carbon-14**

Study: Radioisotopes and the Age of The Earth (RATE), Institute for Creation Research

Samples Tested: 10 coal samples from across the United States, representing different geologic layers and claimed ages (45-300 million years)

Finding: All 10 samples contained measurable C-14.

Average C-14 Age: Approximately 50,000 years (but even this is likely inflated due to post-flood environmental factors; actual age is likely much younger)

Conclusion: Coal is not millions of years old. It is thousands of years old.

Source: Baumgardner, J., "14C Evidence for a Recent Global Flood and a Young Earth," *Radioisotopes and the Age of The Earth*, Vol. 2 (2005)

EVIDENCE BOX: C-14 in Diamonds

Study: RATE project tested diamonds from multiple sources.

Claimed Age: Diamonds are formed deep in the earth's mantle and are claimed to be hundreds of millions to over a billion years old.

Finding: All diamonds tested contained measurable C-14.

Implication: Diamonds cannot be millions of years old. They must be less than 100,000 years old (and likely much younger).

Source: Baumgardner, J., "14C Evidence for a Recent Global Flood and a Young Earth," *Radioisotopes and the Age of The Earth*, Vol. 2 (2005)

## **C-14 in Dinosaur Bones**

In 2012, a team of researchers presented findings at the Western Pacific Geophysics Meeting showing that dinosaur bones contained C-14.

EVIDENCE BOX: C-14 in Dinosaur Fossils

Study:Presented at the Western Pacific Geophysics Meeting, American Geophysical Union, Singapore, 2012

Samples:Multiple dinosaur bone samples from museums and fossil sites, including Triceratops, Hadrosaur, and Allosaurus

Finding:All samples contained measurable C-14.

C-14 Age Range:22,000 to 39,000 years (unadjusted for atmospheric conditions)

Claimed Age:65-100 million years

Conclusion:Dinosaurs did not die 65 million years ago. They died within the last tens of thousands of years—consistent with a global flood approximately 4,350 years ago.

Source: Miller, H., et al., "Dinosaur Bone—Fresh Fossil Bones, Why Are They Radioactive?" Presented at the AGU Western Pacific Geophysics Meeting (2012)

The paper was initially published in the conference proceedings. However, after realizing the implications, the organizers removed the abstract from the online database.

Why?

Because the findings were too damaging to the evolutionary timeline. Rather than addressing the data, they censored it.

## **The Objection: "It Must Be Contamination"**

When confronted with C-14 in coal, diamonds, and dinosaur bones, evolutionary scientists have one standard response:

"It must be contamination."

The argument is that modern carbon (from bacteria, groundwater, or lab handling) contaminated the samples, introducing recent C-14.

Problems with the contamination argument:

The "contamination" explanation is a convenient dismissal, not a scientific rebuttal.

## **Why Doesn't Mainstream Science Test for C-14 in Dinosaurs?**

Here's a question you should be asking:

If dinosaurs are 65 million years old, why don't scientists routinely test them for C-14 to prove there's none there?

Think about it. If dinosaurs are truly millions of years old, testing them for C-14 would be an easy way to confirm it. The tests would come back with zero detectable C-14, and the case would be closed.

But they don't do this.

Why not?

Because they know what they'll find.

Every time someone has tested dinosaur bones for C-14, they've found it. So the solution? Don't test.

In fact, some labs refuse to C-14 test dinosaur fossils. They will only accept samples if you tell them the sample is less than 100,000 years old. If you say it's a dinosaur bone, they reject it—because "everyone knows" dinosaurs are millions of years old, so testing them "makes no sense."

This is circular reasoning:

This is not science. This is dogma.

## **What About Wood in "Ancient" Coal Layers?**

Fossilized wood is often found in coal seams. This wood is claimed to be 50-300 million years old.

Yet it contains C-14.

### **EVIDENCE BOX: C-14 in Fossil Wood**

Finding: Fossilized wood from coal deposits dated by C-14 testing consistently shows ages of 20,000-50,000 years, not millions.

Examples:

Conclusion: The coal and the wood are thousands of years old, not millions. They were buried rapidly during the flood.

Source: Snelling, A., "Radiocarbon in 'Ancient' Fossil Wood," Creation Ex Nihilo Technical Journal 14.2 (2000): 79-86

## **The Implications**

If coal, diamonds, and dinosaur fossils contain C-14, then:

## **The Flood Explains It**

From a biblical perspective, the presence of C-14 in coal, diamonds, and dinosaurs makes perfect sense:

The evidence fits the biblical timeline perfectly.

## **Why This Matters**

C-14 in dinosaur bones, coal, and diamonds is not a minor anomaly. It is a falsification of the evolutionary timeline.

Science is supposed to follow the evidence wherever it leads. If the evidence contradicts the theory, the theory must be revised or discarded.

But in this case, the evidence is ignored, the researchers are silenced, and the narrative continues unchanged.

"They are willingly ignorant."

— 2 Peter 3:5 (KJV)

The evidence is clear. Carbon-14 is where it shouldn't be—if the evolutionary timeline is correct.

But if the biblical timeline is correct, it's exactly where it should be.

## **CHAPTER 22: ANOMALOUS FOSSILS AND ARTIFACTS**

According to the evolutionary timeline, humans and dinosaurs never coexisted. Dinosaurs went extinct 65 million years ago; modern humans appeared only 200,000-300,000 years ago. There should be no evidence of humans and dinosaurs together.

Yet such evidence exists.

Fossils, footprints, and artifacts have been found that do not fit the evolutionary narrative. These are called "out-of-place" or "anomalous" discoveries. Rather than being celebrated as scientific mysteries worthy of investigation, they are ignored, ridiculed, or hidden.

Why?

Because they threaten the timeline.

## Human and Dinosaur Footprints Together

In the 1930s, along the Paluxy River in Glen Rose, Texas, locals discovered fossilized dinosaur footprints in the limestone riverbed. The tracks were well-preserved and clearly showed three-toed theropod dinosaurs (likely Acrocanthosaurus).

But alongside the dinosaur tracks were what appeared to be human footprints.

EVIDENCE BOX: Paluxy River Tracks

Location: Paluxy River, Glen Rose, Texas

Rock Layer: Glen Rose Formation (Cretaceous, claimed age ~110 million years)

Findings:

Controversy: Mainstream paleontology dismisses the prints as erosion, carvings, or misidentified dinosaur tracks. Creationist researchers argue some prints are genuine human tracks.

Source: Morris, J., "The Paluxy River Mystery," Institute for Creation Research (1980); Baugh, C., "Dinosaur: Scientific Evidence That Dinosaurs and Men Walked Together" (1987)

The debate over Paluxy tracks continues. Some prints have been shown to be carvings (locals in the 1930s carved fake tracks to sell to tourists). Others have been explained as partially eroded dinosaur prints. But several prints remain unexplained and show features consistent with human anatomy.

The key question is this: Why are there prints resembling human feet in the same rock layer as dinosaurs?

If humans and dinosaurs are separated by 65 million years, such prints should not exist. But if they lived at the same time (as the Bible indicates), finding them together makes perfect sense.

## **The Ica Stones**

In the 1960s, Dr. Javier Cabrera, a Peruvian physician, amassed a collection of over 15,000 engraved stones depicting advanced knowledge—surgery, astronomy, advanced technology—and images of humans interacting with dinosaurs.

**EVIDENCE BOX: The Ica Stones**

**Location:**Ica, Peru

**Description:**Andesite stones carved with detailed images, including:

**Controversy:**Skeptics claim the stones are modern hoaxes. Two local farmers admitted to carving some stones for tourists. However, stones have been found in pre-Columbian graves, suggesting at least some are ancient.

**Source:** Cabrera, J., "The Message of the Engraved Stones of Ica" (1976); Swift, D., "The Ica Stones," *Creation Ex Nihilo* 19.2 (1997)

The Ica Stones are controversial because:

If the stones are ancient, how did the carvers know what dinosaurs looked like?

The most straightforward explanation: They saw them.

## **The Acámbaro Figurines**

In 1944, German hardware merchant Waldemar Julsrud discovered thousands of clay figurines near Acámbaro, Mexico. Among the human figures, pottery, and animals were detailed sculptures of creatures resembling dinosaurs.

#### EVIDENCE BOX: Acámbaro Figurines

Location: Acámbaro, Mexico

Discovery: Over 33,000 ceramic and stone figurines excavated from 1944-1952

Depictions:

Dating: Thermoluminescence tests in 1972 dated the figurines to 2500 BC. Additional tests in 1998 confirmed ages ranging from 2500 BC to 4000 years ago.

Controversy: Skeptics claim Julsrud paid locals to create the figurines. However, the sheer number (33,000+), the consistent style, and the thermoluminescence dating argue for authenticity.

Source: DiPeso, C., "The Clay Figurines of Acámbaro, Guanajuato, Mexico," *American Antiquity* 18.4 (1953); Hapgood, C., "Mystery in Acámbaro" (1973)

How did pre-Columbian people sculpt anatomically accurate dinosaurs if they had never seen them?

Evolutionists insist they are forgeries. But the dating, the quantity, and the stylistic consistency make a hoax unlikely.

The simpler explanation: They sculpted what they saw.

## The London Hammer

In 1936, Max Hahn discovered a rock near London, Texas with a wooden handle protruding from it. When the rock was broken open, it revealed an iron hammer head embedded in solid rock.

## EVIDENCE BOX: The London Hammer

Discovery: 1936, near London, Texas

Description: An iron hammer with a wooden handle embedded in Cretaceous rock (claimed age ~110 million years)

Analysis:

Implications: If the hammer is embedded in Cretaceous rock, it means humans were present during the age of dinosaurs.

Objection: Skeptics argue the rock concretion formed around a modern hammer. But the petrification of the wood and the unusual iron composition argue against this.

Source: Baugh, C., "Ancient Man and the London Artifact," Creation Evidence Museum; Metallurgical analysis by Battelle Laboratories

The London Hammer is evidence of human technology in "dinosaur-age" rock. This should be impossible if the rock is 110 million years old.

But if the rock formed rapidly during the flood (only ~4,350 years ago), it makes perfect sense. A human tool was buried in flood sediments, which hardened into rock.

## The Antikythera Mechanism

In 1901, divers recovered a corroded bronze device from a shipwreck off the coast of Antikythera, Greece. When x-rayed, the device revealed an intricate system of gears—a mechanical computer used to calculate astronomical positions.

## EVIDENCE BOX: Antikythera Mechanism

Discovery: 1901, Antikythera shipwreck (dated ~60 BC)

Description: A complex mechanical device with over 30 bronze gears, designed to predict eclipses, planetary positions, and Olympic games dates

Technology Level: Comparable to 18th-century clockwork. No similar device appears in the archaeological record for another 1,000 years.

Implication: Ancient civilizations possessed knowledge and technology far beyond what evolutionary models of human development predict.

Source: Freeth, T., et al., "Decoding the ancient Greek astronomical calculator known as the Antikythera Mechanism," *Nature* 444 (2006)

The Antikythera Mechanism proves that ancient people were far more advanced than evolutionary timelines suggest. If humans have been around for 200,000 years (as evolutionists claim), why did advanced civilization only appear in the last 5,000-6,000 years?

The biblical model explains this better: Humans were created intelligent. Advanced technology existed before the flood. After the flood, knowledge had to be rebuilt. The Antikythera Mechanism is a remnant of pre- or early post-flood knowledge.

## Human Fossils in "Wrong" Layers

If the geologic column represents millions of years of slow deposition, human fossils should only appear in the topmost (youngest) layers. Yet human remains and artifacts have been found in much deeper (supposedly older) layers.

### EVIDENCE BOX: Out-of-Place Human Fossils

Sources: Meister, W., "Discovery of Trilobite Fossils in Shod Footprint" (1968); Burdick, C., "The Moab Skeletons," *Creation*

Research Society Quarterly (1973)

These finds are systematically dismissed because they do not fit the narrative. If accepted, they would destroy the geologic column's credibility as a timeline.

But if the layers were deposited rapidly during the flood, there is no problem. Humans, trilobites, and dinosaurs all lived before the flood. When the flood came, they were buried in different sediment layers based on location, mobility, and burial sequence—not millions of years of separation.

## **The Piri Reis Map**

In 1513, Ottoman admiral Piri Reis created a map showing the coastline of Antarctica—without ice.

EVIDENCE BOX: Piri Reis Map

Date: 1513 AD

Content: Shows the coastline of South America, Africa, and Antarctica—including details of the subglacial coastline (currently buried under miles of ice)

Problem: Antarctica was not officially "discovered" until 1820. The ice-free coastline has been buried for millions of years (according to evolutionists) or since the Ice Age (according to biblical chronology).

Implication: The map was based on ancient source maps created when Antarctica was ice-free—suggesting advanced pre-flood civilizations with mapmaking and exploration capabilities.

Source: Hapgood, C., "Maps of the Ancient Sea Kings" (1966)

How did mapmakers know the shape of Antarctica's coastline beneath the ice?

Evolutionary geology claims Antarctica has been ice-covered for millions of years. Yet ancient maps show it ice-free.

The biblical explanation: Before the flood, the earth had a different climate (see Chapter 4: The Firmament). Antarctica may have been habitable. After the flood, the Ice Age rapidly covered it. Ancient maps preserve knowledge from the pre-flood world.

## Why Are These Suppressed?

Every discovery listed in this chapter challenges the evolutionary timeline. If any of them were fully investigated and confirmed:

So instead of investigation, we get:

This is not science. It is damage control.

## Conclusion: The Evidence Is There

Anomalous fossils and artifacts exist. They are physical, tangible, documented.

Each piece of evidence, taken alone, can be disputed. But taken together, they form a pattern:

The world we've been told about is not the world that existed.

Humans and dinosaurs coexisted. Advanced civilizations existed before the flood. The earth is young. The flood was global and catastrophic.

The Bible has been right all along.

## PART 6: SCRIPTURE'S ACCOUNT

"Sanctify them by Your truth. Your word is truth." — John 17:17

# CHAPTER 23: GENESIS 1 — THE CREATION WEEK

The foundation of everything we've discussed in this book is Genesis 1. If Genesis 1 is literal history, then a young earth, a global flood, and humans coexisting with dinosaurs all make sense. If Genesis 1 is myth or allegory, then the entire biblical timeline collapses.

So the question is: Is Genesis 1 literal history?

The answer is yes. And here's why.

## The Text Is Written as Historical Narrative

Genesis 1 is not poetry. It is not parable. It is historical narrative—the same literary style used in the rest of Genesis and throughout the Old Testament historical books.

### EVIDENCE BOX: Literary Genre of Genesis 1

**Analysis:** Hebrew scholars have analyzed the verb forms, sentence structure, and literary markers in Genesis 1.

**Finding:** Genesis 1 uses the waw-consecutive verb form, which is the standard Hebrew construction for historical narrative. This is the same form used in Exodus, Joshua, Judges, Kings, and Chronicles.

**Contrast:** Hebrew poetry (Psalms, Proverbs) uses different verb forms and parallelism. Genesis 1 does not match the pattern of Hebrew poetry.

**Conclusion:** The original audience would have read Genesis 1 as literal history, not allegory.

Source: Boyd, S., "Statistical Determination of Genre in Biblical Hebrew," Radioisotopes and the Age of The Earth, Vol. 2 (2005)

If Yahuah intended Genesis 1 to be taken as history, He wrote it as history. The text itself declares its genre.

## **The Days Are Literal 24-Hour Days**

Some argue that the "days" in Genesis 1 are not literal days but long ages (the "day-age theory"). This is an attempt to fit billions of years into Scripture.

But the text does not allow for this interpretation.

"And Yahuah called the light Day, and the darkness He called Night. So the evening and the morning were the first day."

— Genesis 1:5

Notice the phrase: "evening and morning."

This phrase is repeated for all six creation days. It defines each day as having an evening and a morning—a night and a day—a 24-hour cycle.

If "day" meant a long age, the phrase "evening and morning" makes no sense. What is the "evening" of a billion-year period?

Further evidence:

The days of creation were literal 24-hour days.

## **The Order of Events Contradicts Evolution**

If Genesis 1 is an allegory designed to accommodate evolution, it fails spectacularly. The order of creation in Genesis contradicts the evolutionary timeline.

The order of creation in Genesis 1 cannot be reconciled with evolution.

If Genesis 1 were written to accommodate evolution, it would match the evolutionary order. It doesn't. This is evidence that Genesis 1 is describing what actually happened, not what ancient people thought happened based on evolution.

## **Death Came Through Sin**

One of the most serious theological problems with theistic evolution (the belief that Yahuah used evolution to create) is the issue of death.

"Therefore, just as through one man sin entered the world, and death through sin, and thus death spread to all men, because all sinned..."

— Romans 5:12

According to Scripture, death is the result of sin. Before Adam sinned, there was no death.

But according to evolution, death existed for hundreds of millions of years before humans appeared. Death is not the result of sin; it is the mechanism of evolution ("survival of the fittest").

These two positions are irreconcilable.

If death existed before sin, then:

The gospel itself depends on a literal Genesis. If Genesis 1-3 is not literal history, the foundation of the gospel collapses.

## **Yahusha Affirmed Genesis 1**

Yahusha Himself quoted Genesis as literal history.

"Have you not read that He who made them at the beginning 'made them male and female,' and said, 'For this reason a man shall leave his father and mother and be joined to his wife, and the two shall become one flesh'?"

— Matthew 19:4-5 (quoting Genesis 1:27 and 2:24)

Yahusha quoted Genesis 1 and 2 as the basis for His teaching on marriage. He did not say, "According to the myth..." or "In the allegory of Genesis..." He said, "He who made them at the beginning made them male and female."

Yahusha treated Genesis as literal history. If Genesis is not historical, then Yahusha was wrong—or worse, deceptive.

But if Yahusha is the Truth (John 14:6), then Genesis is true.

## **No Room for Millions of Years**

Where would you fit millions of years into Genesis 1?

None of these attempts to insert millions of years into Genesis work. The text resists them.

Genesis 1 describes a recent, rapid creation—exactly as young earth creationists have always said.

## **The Sabbath**

Yahuah rested on the seventh day, not because He was tired, but to establish the pattern for the Sabbath.

"And on the seventh day Yahuah ended His work which He had done, and He rested on the seventh day from all His work which He had done. Then Yahuah blessed the seventh day and sanctified it, because in it He rested from all His work which Yahuah had created and made."

— Genesis 2:2-3

The Sabbath is based on the creation week. If the creation week was not literal, the Sabbath has no foundation.

But Yahuah commanded the Sabbath as a memorial to creation. Keeping the Sabbath is a declaration that Yahuah created in six days and rested on the seventh.

## **Conclusion: Trust the Text**

Genesis 1 is clear, consistent, and confirmed by Yahusha Himself. It is historical narrative describing what actually happened: Yahuah created the heavens, the earth, and everything in them in six literal days, approximately 6,000 years ago.

You can trust Genesis 1.

It is not allegory. It is not myth. It is the true account of how Yahuah created the world.

And if Genesis 1 is true, then everything we've covered in this book follows: a young earth, a global flood, humans and dinosaurs together, rapid fossilization, and the collapse of the evolutionary timeline.

It all starts with Genesis 1.

## **CHAPTER 24: GENESIS 5 & 11 — THE CHRONOLOGY**

If you ask most people how old the earth is according to the Bible, they'll give you a blank stare. Many Christians have never been taught that Scripture provides a detailed chronology from creation to Abraham—and from Abraham to Yahusha.

But the chronology is there. And it's precise.

Genesis 5 and Genesis 11 provide genealogies that allow us to calculate the age of the earth. When you add up the years, the result is clear: the earth is approximately 6,000 years old.

## **Genesis 5: From Adam to Noah**

Genesis 5 lists the descendants from Adam to Noah, giving the age of each patriarch when his son was born.

EVIDENCE BOX: Genesis 5 Genealogy

From creation to the flood: 1,656 years.

This is straightforward addition. The numbers are given explicitly in the text.

## **Genesis 11: From Noah to Abraham**

Genesis 11 picks up after the flood and provides the genealogy from Shem (Noah's son) to Abraham.

EVIDENCE BOX: Genesis 11 Genealogy

From the flood to Abraham: approximately 350 years.

Adding these together:

## **From Abraham to Yahusha**

From Abraham forward, we can use biblical history and external chronologies to date events.

Adding it all up:

Yahusha was born approximately 4 BC (based on Herod's death and other historical markers). Adding 2,000 years from Yahusha to today gives us:

The earth is approximately 6,000 years old.

# Are There Gaps in the Genealogies?

Some argue that the genealogies in Genesis 5 and 11 contain gaps—that names were skipped, and the actual time span is much longer.

This argument fails for several reasons:

1. The genealogies give specific ages.

The text does not just say "A begat B." It says, "A lived X years and begat B." If there were gaps, the ages would make no sense. For example, Genesis 5:3 says Adam was 130 years old when Seth was born. If there were generations between Adam and Seth, how old was Adam when Seth was actually born? The number becomes meaningless.

2. The genealogies are chronological, not selective.

Other genealogies in Scripture (like Matthew 1) are selective—they skip generations to create symmetry or emphasize certain individuals. But Genesis 5 and 11 are different. They are written as chronologies, not just family trees. The purpose is to provide a timeline from Adam to Noah to Abraham.

3. The New Testament treats them as complete.

Luke 3:36-38 traces Yahusha's genealogy all the way back to Adam, using the same names from Genesis 5 and 11. If the Genesis genealogies had gaps, Luke's genealogy would also have gaps—but Luke presents it as a complete lineage.

4. The phrase "begat" means immediate offspring.

The Hebrew word *yalad*(begat) refers to a direct parent-child relationship, not a distant descendant. When Scripture wants to refer to a distant descendant, it uses different terminology (e.g.,

"son of" can mean descendant, but "begat" is specific).

Conclusion: The genealogies of Genesis 5 and 11 are complete chronologies with no significant gaps. They provide an accurate timeline from creation to Abraham.

## Archbishop Ussher's Chronology

In 1650, Archbishop James Ussher published his famous chronology of world history based on Scripture. Using the genealogies in Genesis, the reigns of kings, and references to historical events, Ussher calculated that creation occurred in 4004 BC.

EVIDENCE BOX: Ussher's Chronology

Date of Creation: October 23, 4004 BC (Ussher's calculation)

Date of the Flood: 2348 BC

Methodology: Ussher used the Masoretic Text (Hebrew Old Testament) and cross-referenced biblical events with known historical dates (e.g., Babylonian and Persian records).

Accuracy: While Ussher's exact date may be off by a few decades (due to uncertainties in ancient calendars and text variations), his general timeframe is sound: the earth is approximately 6,000 years old.

Source: Ussher, J., "Annals of the World" (1650)

Ussher's work was not a fringe calculation. It was the standard chronology used by scholars for over 200 years—until the rise of uniformitarian geology and evolution in the 19th century.

## Other Ancient Chronologies

The Masoretic Text (used by Ussher) is not the only ancient manuscript of the Old Testament. The Septuagint (Greek translation) and the Samaritan Pentateuch give slightly different ages in the genealogies.

The differences are due to textual variations in the ages of the patriarchs. However, all three chronologies place creation within the last 6,000-8,000 years—a far cry from billions of years.

Even if you use the longest chronology (Septuagint), the earth is still extremely young by evolutionary standards.

## **Why the Chronology Matters**

The biblical chronology is not peripheral. It is foundational.

The earth is young. Scripture says so. The evidence confirms it.

## **Conclusion: Scripture Provides a Timeline**

The Bible is not vague about the age of the earth. Genesis 5 and 11 provide a detailed chronology from creation to Abraham. Combined with the known history from Abraham to Yahusha, we can confidently conclude:

The earth is approximately 6,000 years old.

This is not a guess. It is not an interpretation. It is the straightforward reading of Scripture's chronology.

And it completely demolishes the evolutionary timeline.

## **CHAPTER 25: JOB 40-41 — DINOSAURS IN SCRIPTURE**

One of the most compelling evidences that humans and dinosaurs coexisted is found in the book of Job. In chapters 40

and 41, Yahuah describes two creatures: behemoth and Leviathan.

These are not symbolic. They are not mythical. They are real animals that Job would have recognized—creatures that modern readers would call dinosaurs.

## **Job 40:15-24 — Behemoth**

"Look now at the behemoth, which I made along with you; he eats grass like an ox. See now, his strength is in his hips, and his power is in his stomach muscles. He moves his tail like a cedar; the sinews of his thighs are tightly knit. His bones are like beams of bronze, his ribs like bars of iron. He is the first of the ways of Yahuah; only He who made him can bring near His sword. Surely the mountains yield food for him, and all the beasts of the field play there. He lies under the lotus trees, in a covert of reeds and marsh. The lotus trees cover him with their shade; the willows by the brook surround him. Indeed the river may rage, yet he is not disturbed; he is confident, though the Jordan gushes into his mouth. Though he takes it in his eyes, or one pierces his nose with a snare."

— Job 40:15-24

## **What Is Behemoth?**

Many modern Bibles add a footnote suggesting behemoth is a hippopotamus or an elephant.

This is nonsense.

Here's why:

1. "He moves his tail like a cedar"

A cedar tree is massive—tall, thick, and strong. The behemoth's tail is compared to a cedar.

But a sauropod dinosaur (like Brachiosaurus or Diplodocus) has a tail that is thick, muscular, and can be over 40 feet long. That is a tail like a cedar.

2. "His bones are like beams of bronze, his ribs like bars of iron"

This describes an animal with incredibly strong, massive bones. Sauropods had the largest and strongest bones of any land animal—some femurs (thigh bones) were over 6 feet long and weighed hundreds of pounds.

Hippos and elephants do not fit this description.

3. "He is the first of the ways of Yahuah"

The Hebrew phrase means "chief" or "greatest" of Yahuah's works. This animal is described as the most impressive land creature Yahuah made.

A hippo? Not impressive compared to an elephant, rhinoceros, or giraffe.

But a sauropod dinosaur—70+ feet long, weighing 50-80 tons, the largest land animal that ever lived? Yes. That is the "chief of the ways of Yahuah."

4. "Though the river may rage, yet he is not disturbed"

This creature is so large and powerful that even a raging river does not move it. A hippopotamus can be swept away by strong currents. A sauropod, weighing 50+ tons, would be immovable.

Conclusion: Behemoth is a sauropod dinosaur. The description fits perfectly. Any attempt to reinterpret it as a hippo or elephant requires ignoring the plain meaning of the text.

## **Job 41 — Leviathan**

"Can you draw out Leviathan with a hook, or snare his tongue with a line which you lower? Can you put a reed through his nose, or pierce his jaw with a hook? ...Who can remove his outer coat? Who can approach him with a double bridle? Who can open the doors of his face, with his terrible teeth all around? His rows of scales are his pride, shut up tightly as with a seal; one is so near another that no air can come between them...Out of his mouth go burning lights; sparks of fire shoot out. Smoke goes out of his nostrils, as from a boiling pot and burning rushes. His breath kindles coals, and a flame goes out of his mouth....On earth there is nothing like him, which is made without fear. He beholds every high thing; he is king over all the children of pride."

— Job 41:1-2, 13-15, 19-21, 33-34 (selected verses)

## What Is Leviathan?

Modern commentators often claim leviathan is a crocodile.

Again, this doesn't fit.

Here's why:

1. "Out of his mouth go burning lights... His breath kindles coals, and a flame goes out of his mouth"

This creature breathes fire.

Crocodiles do not breathe fire. Neither do whales, sharks, or any known animal today.

But fire-breathing is plausible in a dinosaur.

### EVIDENCE BOX: Fire-Breathing Mechanisms

**Bombardier Beetle:** This modern insect stores two chemicals (hydrogen peroxide and hydroquinone) in separate chambers. When threatened, it mixes the chemicals, producing a violent

exothermic reaction that sprays boiling liquid at predators—complete with a popping sound and a small explosive discharge.

**Implication:** If a tiny beetle can produce explosive chemical reactions for defense, a large dinosaur could have had similar (but more advanced) chemical chambers. Mixing reactive chemicals could produce flames or intense heat.

**Fossil Evidence:** Some dinosaur skulls (e.g., hadrosaurs, parasaurolophus) have large, hollow nasal cavities and complex sinus systems. These could have housed chemical storage chambers.

**Source:** Eisner, T., "For Love of Insects," Harvard University Press (2003); Morris, H., "The Biblical Basis for Modern Science" (1984)

Fire-breathing may sound fantastical, but it is chemically plausible—and it matches the biblical description of leviathan.

2. "His rows of scales are his pride, shut up tightly as with a seal"

Leviathan is covered in scales so tightly fitted that "no air can come between them." This describes armor plating, not the scales of a crocodile (which have gaps).

Some dinosaurs (e.g., Ankylosaurus, Stegosaurus) had thick, bony plates and scutes covering their bodies. Marine reptiles like mosasaurs and plesiosaurs also had tough, overlapping scales.

3. "On earth there is nothing like him, which is made without fear"

Leviathan is described as the apex predator—fearless, unmatched. A crocodile does not fit this description. Crocodiles fear humans, lions, and other large predators.

But a large theropod dinosaur (like *Tyrannosaurus rex*) or a massive marine reptile? Yes. That would be a creature "made without fear."

Conclusion: Leviathan is most likely a large dinosaur or marine reptile, possibly capable of expelling flammable gases or chemicals (interpreted as "fire-breathing").

## Why This Matters

If behemoth and leviathan are dinosaurs, then humans and dinosaurs coexisted.

Job is a historical book. Yahuah is describing real creatures that Job could observe. These are not allegories. They are descriptions of living animals.

Implications:

## Other Biblical References to Large Creatures

Behemoth and leviathan are not the only large creatures mentioned in Scripture.

Psalm 74:13-14 "You divided the sea by Your strength; You broke the heads of the sea serpents in the waters. You broke the heads of Leviathan in pieces, and gave him as food to the people inhabiting the wilderness."

Psalm 104:25-26 "This great and wide sea, in which are innumerable teeming things, living things both small and great. There the ships sail about; there is that Leviathan which You have made to play there."

Isaiah 27:1 "In that day Yahuah with His severe sword, great and strong, will punish Leviathan the fleeing serpent, Leviathan the twisted serpent; and He will slay the reptile that is in the sea."

These passages describe leviathan as a real, physical creature living in the sea. Some passages refer to Yahuah's judgment on leviathan (possibly symbolic of spiritual enemies), but the creature itself is real.

## **Dragon Legends and Behemoth/Leviathan**

The descriptions of behemoth and leviathan match dragon legends from around the world (see Chapter 7).

The simplest explanation: Dragon legends are cultural memories of real encounters with dinosaurs. Job 40-41 preserves the biblical record of these creatures.

## **Modern Objections**

Objection 1: "Fire-breathing is impossible."

Response: The bombardier beetle proves that chemical-based explosive reactions are possible in nature. A larger creature with more advanced chemical storage could produce flames.

Objection 2: "Behemoth is just poetic language."

Response: The entire passage in Job 38-41 is Yahuah teaching Job about His creation using real animals. Yahuah points to the ostrich, the horse, the eagle, the wild donkey, the hawk—all real creatures. Why would He suddenly switch to a mythical animal?

Objection 3: "Dinosaurs went extinct millions of years before humans existed."

Response: That is the evolutionary assumption. The biblical and physical evidence (soft tissue, C-14, human-dinosaur artifacts) refutes that assumption.

## **Conclusion: Dinosaurs in the Bible**

Job 40-41 provides a clear biblical description of dinosaurs:

These are not allegories. They are real creatures that lived alongside humans in the post-flood world.

The Bible is accurate. Dinosaurs lived recently. Humans saw them.

The evidence is in Scripture. The question is: will you believe it?

## **CHAPTER 26: OTHER BIBLICAL EVIDENCE**

Beyond Genesis 1, the genealogies, and Job 40-41, there are numerous other passages in Scripture that affirm a young earth, a global flood, and the recent coexistence of humans with the creatures we now call dinosaurs.

Let's examine some of the most important ones.

### **1. The Six-Day Creation Pattern Throughout Scripture**

The six-day creation is not mentioned only in Genesis 1. It is affirmed throughout the Old and New Testaments.

Exodus 20:11 "For in six days Yahuah made the heavens and the earth, the sea, and all that is in them, and rested the seventh day. Therefore Yahuah blessed the Sabbath day and hallowed it."

Exodus 31:17 "It is a sign between Me and the children of Israel forever; for in six days Yahuah made the heavens and the earth, and on the seventh day He rested and was refreshed."

These are not poetic or allegorical. They are legal declarations given by Yahuah Himself as the foundation for the Sabbath commandment. If the days were long ages, the Sabbath makes

no sense.

## **2. Noah's Flood Was Global, Not Local**

Some try to argue that the flood was a localized event—a regional flood in Mesopotamia, not a worldwide catastrophe. Scripture demolishes this argument.

Genesis 7:19-20 "And the waters prevailed exceedingly on the earth, and all the high hills under the whole heaven were covered. The waters prevailed fifteen cubits upward, and the mountains were covered."

"All the high hills under the whole heaven." This is unambiguous. Every mountain on earth was covered.

Genesis 7:21-23 "And all flesh died that moved on the earth: birds and cattle and beasts and every creeping thing that creeps on the earth, and every man. All in whose nostrils was the breath of the spirit of life, all that was on the dry land, died. So He destroyed all living things which were on the face of the ground: both man and cattle, creeping thing and bird of the air. They were destroyed from the earth. Only Noah and those who were with him in the ark remained alive."

Every air-breathing land animal died. Every human outside the ark died. This was not a local flood.

2 Peter 3:6 "By which the world that then existed perished, being flooded with water."

Peter, writing under the inspiration of the Ruach HaQodesh, affirms that the entire world was destroyed by water. Not a region. The world.

## **3. The Promise of the Rainbow**

After the flood, Yahuah made a covenant with Noah:

Genesis 9:11-15 "Thus I establish My covenant with you: Never again shall all flesh be cut off by the waters of the flood; never again shall there be a flood to destroy the earth....I set My rainbow in the cloud, and it shall be for the sign of the covenant between Me and the earth. ...The waters shall never again become a flood to destroy all flesh."

If the flood was local, Yahuah's promise has been broken countless times. There have been many regional floods throughout history.

But if the flood was global—covering the entire earth—then Yahuah's promise holds. There has never been another global flood, and there never will be.

The rainbow is the sign of a global covenant.

## THE RAINBOW AS STRUCTURAL EVIDENCE

Notice that the rainbow appears after the flood as a sign of the covenant. This may indicate that rainbows were not visible before the flood.

Why not? A rainbow is an optical phenomenon that requires specific atmospheric conditions—water droplets in the air refracting sunlight at a particular angle. If the firmament barrier existed before the flood, the optical properties of the sky would have been different.

Possibilities include:

After the flood—when the barrier was breached, the waters above were released, and the atmospheric system changed—rainbows became visible for the first time. Yahuah chose this new optical phenomenon as the sign of His covenant never to flood the earth again.

This supports the solid barrier model: the pre-flood world had a fundamentally different atmospheric and optical system than the

post-flood world.

## **4. The Ark's Purpose**

Why did Noah need to build an ark if the flood was only regional?

The ark only makes sense if the flood was global and there was no escape except through Yahuah's provision.

## **5. Yahusha Affirmed the Flood as Historical**

Matthew 24:37-39 "But as the days of Noah were, so also will the coming of the Son of Man be. For as in the days before the flood, they were eating and drinking, marrying and giving in marriage, until the day that Noah entered the ark, and did not know until the flood came and took them all away, so also will the coming of the Son of Man be."

Yahusha compared His second coming to the flood. He treated the flood as a literal, historical event—not a myth or allegory.

If Yahusha treated it as literal, so must we.

## **6. Peter Connects the Flood to Future Judgment**

2 Peter 3:3-7 "Scoffers will come in the last days, walking according to their own lusts, and saying, 'Where is the promise of His coming? For since the fathers fell asleep, all things continue as they were from the beginning of creation.' For this they willfully forget: that by the word of Yahuah the heavens were of old, and the earth standing out of water and in the water, by which the world that then existed perished, being flooded with water. But the heavens and the earth which are now preserved by the same word, are reserved for fire until the

day of judgment and perdition of ungodly men."

Peter warns that scoffers will deny the global flood and the coming judgment. Sound familiar?

Uniformitarianism ("all things continue as they were") is the exact worldview Peter prophesied would dominate in the last days. Evolutionists assume slow, gradual processes over millions of years—denying catastrophic judgment.

Peter says they "willfully forget" the flood. The evidence is there. The suppression is deliberate.

## **7. The Tower of Babel and the Dispersion**

Genesis 11:1-9 "Now the whole earth had one language and one speech. ...And Yahuah said, 'Indeed the people are one and they all have one language, and this is what they begin to do; now nothing that they propose to do will be withheld from them. Come, let Us go down and there confuse their language, that they may not understand one another's speech.' So Yahuah scattered them abroad from there over the face of all the earth, and they ceased building the city."

After the flood, humanity gathered in one location (Babel). Yahuah confused their languages and scattered them across the earth.

This explains:

## **8. The Lifespan Decline**

Notice the pattern of human lifespans in Scripture:

Why the rapid decline in lifespans after the flood?

The pre-flood environment (firmament, higher atmospheric pressure, enhanced radiation shielding) was gone. Post-flood conditions were harsher:

The biblical record matches the young earth model perfectly. If humans have been around for 200,000 years, why did lifespans suddenly drop ~4,000 years ago? Evolution has no answer. The flood explains it.

## **9. All Nations from One Blood**

Acts 17:26 "And He has made from one blood every nation of men to dwell on all the face of the earth, and has determined their preappointed times and the boundaries of their dwellings."

All humans descend from Adam—and after the flood, from Noah. This is confirmed by:

Scripture is right: all nations come from one blood.

## **10. The Curse and the Restoration**

Romans 8:20-22 says:

"For the creation was subjected to futility, not willingly, but because of Him who subjected it in hope; because the creation itself also will be delivered from the bondage of corruption into the glorious liberty of the children of Yahuah. For we know that the whole creation groans and labors with birth pangs together until now."

Creation is under a curse because of Adam's sin (Genesis 3:17-19). This curse affects the entire physical world:

But the curse will be lifted when Yahusha returns and restores creation (Revelation 21-22; Isaiah 11:6-9, 65:25).

This only makes sense in a young earth model.

If the earth is billions of years old, and death, decay, and suffering existed for hundreds of millions of years before Adam, then:

But if creation is young, and death entered through Adam's sin, then the gospel makes sense: Yahusha came to undo the curse and restore creation to its original state.

## **Conclusion: Scripture Is Unified on a Young Earth**

From Genesis to Revelation, Scripture consistently affirms:

There is no room in Scripture for billions of years, evolutionary processes, or a local flood.

The Bible is clear. The question is: will you believe it?

## **CONCLUSION**

## **CHAPTER 27: PUTTING IT ALL TOGETHER**

We've covered a lot of ground in this book. Let's bring it all together.

### **The Big Picture**

For the last 150 years, the world has been told a story:

This book has shown that every part of that story is false.

### **What the Evidence Actually Shows**

1. The Earth Is Young (Thousands, Not Billions of Years)
2. There Was a Global Flood (~4,350 Years Ago)

3. Humans and Dinosaurs Coexisted
4. The Pre-Flood World Was Radically Different
5. The Evidence Is Being Suppressed

## **Why It Matters**

This is not just an academic debate. The question of origins has profound implications:

If Evolution Is True:

If Genesis Is True:

The stakes could not be higher.

## **The Pattern of Scripture**

Genesis 1-11 is the foundation for everything that follows:

If Genesis 1-11 is not historical, the entire biblical narrative collapses. But if it is historical (and the evidence shows it is), then everything else in Scripture stands.

## **The Two Worldviews**

These are not compatible worldviews. One is true, the other is false.

The evidence supports the biblical worldview.

## **Final Summary: The World Before the Flood**

The pre-flood world was radically different from today:

When the flood came, this world was destroyed:

After the flood, the world changed:

This is the world the Bible describes. This is the world the evidence supports.

## **What Now?**

You've read the evidence. You've seen how the pieces fit together. The question now is:

What will you do with this information?

Will you continue to believe the evolutionary narrative, even though the evidence contradicts it?

Or will you accept that Scripture is accurate, historical, and trustworthy—even when it challenges everything you've been taught?

The choice is yours.

But understand this: the truth matters.

If Yahuah created the world, then He owns it—and you. If He judged the world once with water, He will judge it again with fire (2 Peter 3:7). If death came through sin, then you need a Savior.

The gospel only makes sense in light of Genesis.

## **CHAPTER 28: THE CALL TO BELIEVE SCRIPTURE**

This book has presented overwhelming evidence for a young earth, a global flood, and the recent coexistence of humans with dinosaurs. But evidence alone will not save you.

You must respond to the truth.

## **The Foundation: Genesis Is True**

If you accept that Genesis is literal history, then you must also accept:

Genesis is not just ancient history. It is the foundation of the gospel.

## **The Problem: You Are a Sinner**

"For all have sinned and fall short of the glory of Yahuah."

— Romans 3:23

You have broken Yahuah's law. Whether you realize it or not, you have:

"The wages of sin is death."

— Romans 6:23a

Death is not natural. It is the penalty for sin. And unless that penalty is paid, you will face eternal judgment.

"And as it is appointed for men to die once, but after this the judgment."

— Hebrews 9:27

You cannot save yourself. No amount of good works, religious rituals, or moral improvement can erase your sin.

"For by grace you have been saved through faith, and that not of yourselves; it is the gift of Yahuah, not of works, lest anyone should boast."

— Ephesians 2:8-9

## **The Solution: Yahusha the Messiah**

Yahuah is both just and merciful. He cannot overlook sin (He is just), but He desires to save sinners (He is merciful). So He provided a solution:

"But Yahuah demonstrates His own love toward us, in that while we were still sinners, Messiah died for us."

— Romans 5:8

Yahusha, the Son of Yahuah, took on human flesh and lived a sinless life. He perfectly obeyed the Torah—something no other human has done. Then He willingly went to the stake (cross) and took the penalty for sin upon Himself.

"For He made Him who knew no sin to be sin for us, that we might become the righteousness of Elohim in Him."

— 2 Corinthians 5:21

Yahusha died, was buried, and rose again on the third day—defeating death and proving His victory over sin.

"But now Messiah is risen from the dead, and has become the firstfruits of those who have fallen asleep. For since by man came death, by Man also came the resurrection of the dead. For as in Adam all die, even so in Messiah all shall be made alive."

— 1 Corinthians 15:20-22

This is the gospel: Yahusha died for your sins, was buried, and rose again. He offers you forgiveness, life, and reconciliation with Yahuah.

## **The Response: Repent and Believe**

What must you do to be saved?

"Repent, and let every one of you be baptized in the name of Yahusha Messiah for the remission of sins; and you shall

receive the gift of the Ruach HaQodesh."

— Acts 2:38

### 1. Repent

Repentance means turning from sin and turning to Yahuah. It is not just feeling sorry—it is a change of heart and direction.

### 2. Believe

Saving faith is not just intellectual agreement. It is trust—placing your full confidence in Yahusha and His finished work on the stake.

"For the wages of sin is death, but the gift of Yahuah is eternal life in Messiah Yahusha our Master."

— Romans 6:23

"If you confess with your mouth the Master Yahusha and believe in your heart that Yahuah has raised Him from the dead, you will be saved. For with the heart one believes unto righteousness, and with the mouth confession is made unto salvation."

— Romans 10:9-10

### 3. Obey

True saving faith produces obedience. If you truly believe, you will follow Yahusha.

"If you love Me, keep My commandments."

— John 14:15

This means:

## **The Warning: Judgment Is Coming**

Just as Yahuah judged the world with the flood, He will judge it again.

"But the day of Yahuah will come as a thief in the night, in which the heavens will pass away with a great noise, and the elements will melt with fervent heat; both the earth and the works that are in it will be burned up."

— 2 Peter 3:10

The next judgment will not be water—it will be fire.

If you reject Yahusha, you will face the wrath of Yahuah:

"He who believes in the Son has everlasting life; and he who does not believe the Son shall not see life, but the wrath of Yahuah abides on him."

— John 3:36

Time is running out.

Just as Noah warned the world for 120 years, and they did not listen, so too the gospel is being preached today—and most will not listen.

"And as it was in the days of Noah, so it will be also in the days of the Son of Man: They ate, they drank, they married wives, they were given in marriage, until the day that Noah entered the ark, and the flood came and destroyed them all."

— Luke 17:26-27

Do not be like those who perished in the flood. Enter the Ark—Yahusha Messiah—while there is still time.

## **The Promise: Eternal Life**

If you repent and believe, Yahuah promises:

"And Yahuah will wipe away every tear from their eyes; there shall be no more death, nor sorrow, nor crying. There shall be no more pain, for the former things have passed away."

— Revelation 21:4

The curse will be removed. Creation will be restored. Death will be defeated. And Yahuah will dwell with His people forever.

## **The Call**

This book has shown you that Scripture is true. Genesis is history. The flood happened. Yahuah created the world. You are accountable to Him.

Now the question is: What will you do?

"Behold, now is the accepted time; behold, now is the day of salvation."

— 2 Corinthians 6:2b

Do not harden your heart. Do not delay. Call upon the name of Yahuah and be saved.

"For 'whoever calls on the name of Yahuah shall be saved.'"

— Romans 10:13

## **A Prayer of Repentance and Faith**

If you are ready to repent and believe, you can pray something like this (but remember: it is not the words themselves that save you—it is the sincerity of your heart):

"Yahuah, I acknowledge that I am a sinner. I have broken Your law. I deserve Your judgment. But I believe that Yahusha, Your Son, died on the stake for my sins and rose again. I repent of my sins and turn to You. I trust in Yahusha alone for my

salvation. Forgive me, cleanse me, and make me new. I surrender my life to You. In Yahusha's name, amen."

If you prayed that prayer and meant it, welcome to the family of Yahuah.

## **Next Steps**

If you have repented and believed:

## **Final Word**

Before the flood, the world was filled with violence and wickedness. Yahuah saw it, judged it, and destroyed it—saving only Noah and his family.

The world today is no different.

Violence, immorality, rebellion against Yahuah—it is everywhere. And just as judgment came in Noah's day, it is coming again.

But Yahuah is patient:

"Yahuah is not slack concerning His promise, as some count slackness, but is longsuffering toward us, not willing that any should perish but that all should come to repentance."

— 2 Peter 3:9

He is giving you time to repent. Do not waste it.

Believe Scripture. Trust Yahusha. Be saved.

## **APPENDICES**

### **APPENDIX A: SOURCE BIBLIOGRAPHY**

This appendix provides a comprehensive list of sources cited throughout this book. For space reasons, this is a selective bibliography of key works. Full citations appear in the text where relevant.

## **Young Earth Creationism — General Works**

### **Radiometric Dating and the RATE Project**

### **Dinosaur Soft Tissue**

### **Flood Geology**

### **Behemoth, Leviathan, and Dragons**

### **Genesis and Biblical Chronology**

### **Additional Resources**

## **APPENDIX B: DRAGON LEGENDS BY CULTURE**

This appendix catalogs dragon legends from cultures around the world. The consistency of descriptions across isolated cultures suggests a common source: real encounters with creatures we now call dinosaurs.

### **European Dragons**

### **Asian Dragons**

### **Middle Eastern Dragons**

## **American Dragons**

## **African Dragons**

## **Australian and Oceanic Dragons**

## **Common Features Across Cultures**

Conclusion: The universal presence of dragon legends, with remarkably consistent descriptions, suggests these are cultural memories of real creatures—what we now call dinosaurs.

## **APPENDIX C: SOFT TISSUE DISCOVERIES LIST**

This appendix documents published instances of soft tissue, proteins, and organic material discovered in dinosaur and other "ancient" fossils. These discoveries are impossible if the fossils are millions of years old.

## **Dinosaur Soft Tissue Discoveries**

## **Other "Ancient" Fossils with Soft Tissue**

Implication: If soft tissue, proteins, and DNA cannot survive more than thousands of years (even under ideal conditions), these fossils cannot be millions of years old. They must be thousands of years old—consistent with the biblical timeline of a global flood ~4,350 years ago.

## **APPENDIX D: FLOOD LEGENDS WORLDWIDE**

Over 200 cultures around the world have flood legends. The consistency of core elements (global flood, one family saved, animals preserved, divine judgment) suggests these are not

independent myths but cultural memories of the same event: Noah's flood.

## **Key Elements Found in Flood Legends**

### **Flood Legends by Region**

Middle Eastern:

Asian:

American:

Pacific:

African:

European:

## **Analysis: Why So Many Similarities?**

Critics claim these are independent myths. But the similarities are too precise:

The simplest explanation: These legends all stem from a single real event—the global flood described in Genesis 6-9. As humanity dispersed after Babel (Genesis 11), they carried the memory of the flood with them. Over time, the details became embellished or corrupted, but the core narrative remained.

Conclusion: The Bible's account is the original. The other legends are echoes.

## **APPENDIX E: RESPONSE TO COMMON OBJECTIONS**

This appendix addresses the most common objections to young earth creationism and the global flood. These responses are

brief; for detailed answers, see the recommended resources in Appendix A.

## **Objection 1: "Radiometric dating proves the earth is billions of years old."**

Response:

## **Objection 2: "Dinosaurs and humans are separated by 65 million years. They never coexisted."**

Response:

## **Objection 3: "A global flood is geologically impossible."**

Response:

## **Objection 4: "The ark couldn't hold all the animals."**

Response:

## **Objection 5: "Where did all the water go after the flood?"**

Response:

## **Objection 6: "What about distant starlight? If the universe is young, how can we see stars millions of light-years away?"**

Response:

## **Objection 7: "Genesis 1 is poetry, not literal history."**

Response:

## **Objection 8: "Believing in a young earth makes Christians look foolish."**

Response:

END OF BOOK

For Yahuah's glory and the proclamation of His truth.

## BOOK 2 OF THE END TIMES MASTER SERIES

*“The world that was destroyed—and the world that will be again.”*

Before the Flood, the earth was filled with giants.  
Nephilim walked among men. Fallen angels corrupted all flesh.  
Antediluvian technology rivaled—and surpassed—our own.  
And Yahuah destroyed it all with water.

This book exposes the pre-Flood world that academia hides: advanced civilizations, genetic manipulation, angelic rebellion, and the giants who ruled the earth.

It proves from Scripture, archoology, and suppressed history that Yahusha Himself warned: “As it was in the days of Noah, so shall it be at the coming of the Son of Man.”

The Nephilim are returning. The deception is global.  
Are you ready for the second judgement?

### INSIDE THIS BOOK:

- The Genesis 6 conspiracy—fallen angels and human women
- Evidence of antediluvian giants and technology
- Flood geology and worldwide catastrophe proof
- The return of the Nephilim in the end times
- Why this history has been suppressed

*“There were giants in the earth in those days; and also after that...”*  
—Genesis 6:4

**TRUTH CARRIERS MINISTRY**

[www.truthcarriers.com](http://www.truthcarriers.com)
